This book is useful for researchers and professionals working in the areas of industrial and production engineering, supply chain management, quality control, and allied fields.

SPS2020 K. Säfsen, F. Elgh, 2020-12-24 Knowledge intensive product realization implies embedded intelligence, meaning that if both theoretical and practical knowledge and understanding of a subject is integrated into the design and production processes of products, this will significantly increase added value. This book presents papers accepted for the 9th Swedish Production Symposium SPS2020, hosted by the School of Engineering Jönköping University, Sweden, and held online on 7 flexible production, virtual production, development humans in production systems, circular production systems, and maintenance integrated product and production development, advanced and optimized components, materials, and manufacturing digitalization for smart products and services, and responsive and efficient operations and supply chains. In addition, the book presents five special sessions from the symposium: development of changeable and reconfigurable production systems, smart production system design and development, supply chain relocation management, manufacturing digitalization, and additive manufacturing in the production system. The book will be of interest to all those working in the field of knowledge intensive product realization.

Science of Selenium Rahman Kalilur, 2019-12-11 Step by step guide to understand key concepts for Selenium Automation using examples to shine in your interview for test automation roles.
