Technique Civilisation Mumford Lewis:

Technics and Civilization Lewis Mumford, 2010-10-30 Technics and Civilization first presented its compelling history of the machine and critical study of its effects on civilization in 1934 before television the personal computer and the Internet even appeared on our periphery Drawing upon art science philosophy and the history of culture Lewis Mumford explained the origin of the machine age and traced its social results asserting that the development of modern technology had its roots in the Middle Ages rather than the Industrial Revolution Mumford sagely argued that it was the moral economic and political choices we made not the machines that we used that determined our then industrially driven economy Equal parts powerful history and polemic criticism Technics and Civilization was the first comprehensive attempt in English to portray the development of the machine age over the last thousand years and to predict the pull the technological still holds over us today The questions posed in the first paragraph of Technics and Civilization still deserve our attention nearly three quarters of a century after they were written Journal of Technology and Culture

Samuel Johnson's Pragmatism and Imagination Stefka Ritchie, 2018-11-07 The central theme of this book is an under studied link between the canon of Francis Bacon's and Isaac Newton's scientific and philosophical thought and Samuel Johnson's critical approach that can be traced in a textual study of his literary works The interpretive framework adopted here encourages familiarity with the history and philosophy of science confirming that the history of ideas is an entirely human construct that constitutes an integral part of intellectual history This further endorses the argument that intermediality can only be of benefit to future research into the richness of Johnson's literary style As perceived boundaries are crossed between conventionally distinct communication media the profile of Johnson that emerges is of a writer of passionate intelligence who was able to combine a pragmatic approach to knowledge with flights of imagination as a true artist

L'horlogerie des bourgeois conquérants Natalie Petiteau, 1994 *Key Thinkers for the Information Society* Christopher May, 2003 Key Thinkers for the Information Society provides an introduction to some important social theorists whose work has considerable relevance to today's brave new world of information and communication technologies With the aim of widening current perspectives on the information society each contributor introduces a particular theorist and discusses the way in which their insights can be reintroduced into debates regarding the social political and cultural impact of ICTs Theorists presented in Volume 1 include some well known and some less well known figures Walter Benjamin Murray Edelman Jacques Ellul Harold Innes Lewis Mumford Karl Polanyi Eric Elmer Scattachneider and Raymond Williams Each has something fresh and pertinent to say and taken as a whole this volume provides an exciting new resource for contemporary studies

Music in Society Ivo Supićić, 1987 The subject of this study has two distinct but not unrelated aspects first an investigation into the sociology of music as an

autonomous and specialized discipline and second an examination of certain fundamental facts that may be considered within the purview of the sociology of music itself If an analysis and study even a preliminary one of these facts is to be properly focused and fruitful we must first try to determine the subject and methods of the sociology of music its position and boundaries in respect to musicology and most especially its relation to the aesthetics of music and music history It is equally indispensable to ascertain what the sociology of music as a separate scholarly discipline embraces where its investigation leads and finally to establish its position vis a vis sociology in general From the Author s Introduction

Technique Et Liberte , Theology and Technique Jacques Ellul,2024-02-21 Theology and Technique is a posthumous incomplete volume drafted in the 1970s that nevertheless constitutes a significant addition to the Ellul corpus Working from Jacques Ellul s original outline a collaborative team including three of Ellul s children a grandson and Ellul scholars has assembled previous partial publications that Ellul himself approved for eventual incorporation along with relevant unpublished essays and notes into a book which throws the relationship between Ellul s radical theology and sociological critique into fresh perspective Frederic Rognon contributes an especially insightful general introduction The translation by Christian Roy is a model of rendering the complexities of the French original into English This latest Ellul publication will be essential to any serious attempt to appreciate the scope and depth of Ellul s Christian engagement with the challenges of the contemporary world

The Information Society: Evolving Landscapes Jacques Berleur,Andrew Clement,Richard Sizer,Diane Whitehouse,2013-11-11 UR Reader consists of a set of essays written by international authors many 0 of whom are acknowledged experts in one or more aspects of information technology IT and its implications for society The contents have been influenced by the fact that the relationship between IT and society has to be considered in an holistic context Our purpose has been to present this series of

essays in the loosely related perspectives of landscapes which reflect that holism As editors we have chosen to leave people free to select the different perspectives and traverse the landscapes in any manner they choose The Reader seeks to raise social awareness of the issues at stake when we talk 1 about computers and social accountability and aims to encourage wider discussion of the issues involved It has a normative set of aims and indicates a determination to explore a possible reshaping and restructuring of information technology according to human needs In an Epilogue new pointers are given for action In what follows we describe the rationale behind The Information Society Evolving Landscapes we move from the conference held at the University of Namur in June 1988 which shaped the perspectives then on to the various routes by which the landscapes can be traversed **History of Techniques: Techniques and civilizations** Bertrand Gille,1986
