Technology And Innovation For Social Change:

Technology and Innovation for Social Change Satyajit Majumdar, Samapti Guha, Nadiya Marakkath, 2014-12-04

Tension exists between technologists and social thinkers because of the impact technology and innovation have on social values and norms which is often viewed as damaging to the cultural fabric of a nation or society. Since the global business environment is the context in which implementation of technology and innovation takes place, it is widely accepted as the major reason for such conflicts. In this backdrop, this edited book integrates independent research from across the globe. It deals with the nature and significance of technology innovation and social change as well as the relationships between them and discusses the significance of social entrepreneurship from social innovation and technology perspectives. Research areas covered are related to the development and deployment of technology innovation and knowledge in social change capabilities of institutions, models, role of government and corporate social responsibility and community involvement. Multiple aspects of social change are discussed in the context of India, Mexico, Thailand, Cambodia, Laos, Vietnam, Ethiopia, Nigeria, and other African countries. But society does not silently accept technologically enforced changes; sometimes technology is seen as an enemy of inclusive growth and for many economic development is an anti-thesis of social change. Selected case studies on sector-specific technologies such as the use of genetically modified seeds in agriculture, which has impacted the market and society, are critically analyzed to develop insights into the adoption of technology and its impact. At the same time, it examines policy-related issues without any bias in favor of or against a specific technology. Innovation—The Missing Dimension

Richard K. Lester, Michael J. Piore, 2004-10-29. Amid mounting concern over the loss of jobs to low wage economies, one fact is clear: America's prosperity hinges on the ability of its businesses to continually introduce new products and services. But what makes for a creative economy? How can the remarkable surge of innovation that fueled the boom of the 1990s be sustained? For an answer, Richard K. Lester and Michael J. Piore examine innovation strategies in some of the economy's most dynamic sectors. Through eye-opening case studies of new product development in fields such as cell phones, medical devices, and blue jeans, two fundamental processes emerge. One of these processes, analysis, rational problem solving, dominates management and engineering practice. The other interpretation is not widely understood or even recognized, although as the authors make clear, it is absolutely crucial to innovation. Unlike problem solving, interpretation embraces and exploits ambiguity, the wellspring of creativity in the economy. By emphasizing interpretation and showing how these two radically different processes can be combined, Lester and Piore's book gives managers and designers the concepts and tools to keep new products flowing. But the authors also offer an unsettling critique of national policy. By ignoring the role of interpretation, economic policymakers are drawing the wrong lessons from the 1990s boom. The current emphasis on expanding the reach of market competition will help the analytical processes needed to implement innovation. But if unchecked, it risks choking off the economy's vital interpretive spaces. Unless a more balanced policy approach is adopted, warn Lester and Piore, America's

Carayannis, Aris Kaloudis, Age Mariussen, 2008-01-01 The key message of this book is that heterogeneity should be seen as an intrinsic and indispensable element of knowledge systems. The authors address the concept of heterogeneity in a multi-disciplinary fashion including perspectives from evolutionary economics and innovation system studies and relate this approach to existing theories in a broad range of fields. The book postulates that one approach to such a re-conceptualization is what we call the Mode 3 system consisting of Innovation Networks and Knowledge Clusters for knowledge creation, diffusion and use. This is a multi-layered, multi-modal, multi-nodal and multi-lateral system encompassing mutually and complementary reinforcing innovation networks and knowledge clusters consisting of human and intellectual capital shaped by social capital and underpinned by financial capital. *Diversity in the Knowledge Economy and Society* will appeal to academics and researchers of innovation and science, knowledge management and economics. *Social Sciences and Innovation* OECD, 2001-06-05

These workshop proceedings examine the contribution of the social sciences to improving our understanding of social and technological innovation processes to overcoming barriers to innovation and how innovation can improve social science. *Technologies for Development* Silvia Hostettler, Samira Najih Besson, Jean-Claude Bolay, 2020-10-08 This open access book presents 18 case studies that explore current scientific and technological efforts to address global development issues such as poverty from a holistic and interdisciplinary point of view, putting actual impacts at the centre of its analysis. It illustrates the use of technologies for development in various fields of research such as humanitarian action, medical and information and communication technology, disaster risk reduction, technologies, habitat and sustainable access to energy. The authors discuss how innovative technologies such as unmanned aerial vehicles for disaster risk reduction, crowdsourcing humanitarian data, online education and ICT-based medical technologies can have significant social impact. The book brings together the best papers of the 2016 International Conference on Technologies for Development at EPFL, Switzerland. The book explores how the gap between innovation in the global South and actual social impact can be bridged. It fosters exchange between engineers, other scientists, practitioners and policy makers active at the
