Information and Communication Technology (ICT) and Enhancement of Education in the 21st Century in Nigeria Chibuogwu V. Nnaka, Adolphus A. Okafor, 2004 *Agricultural Innovation Systems* The World Bank, 2012-02-21
Managing the ability of agriculture to meet rising global demand and to respond to the changes and opportunities will require good policy sustained investments and innovation not business as usual Investments in public Research and Development extension education and their links with one another have elicited high returns and pro poor growth but these investments alone will not elicit innovation at the pace or on the scale required by the intensifying and proliferating challenges confronting agriculture Experience indicates that aside from a strong capacity in Research and Development the ability to innovate is often related to collective action coordination the exchange of knowledge among diverse actors the incentives and resources available to form partnerships and develop businesses and conditions that make it possible for farmers or entrepreneurs to use the innovations While consensus is developing about what is meant by innovation and innovation system no detailed blueprint exists for making agricultural innovation happen at a given time in a given place for a given result The AIS approach that looks at these multiple conditions and relationships that promote innovation in

agriculture has however moved from a concept to a sub discipline with principles of analysis and action AIS investments must be specific to the context responding to the stage of development in a particular country and agricultural sector especially the AIS This sourcebook contributes to identifying designing and implementing the investments approaches and complementary interventions that appear most likely to strengthen AIS and to promote agricultural innovation and equitable growth It emphasizes the lessons learned benefits and impacts implementation issues and prospects for replicating or expanding successful practices The information in this sourcebook derives from approaches that have been tested at different scales in different contexts It reflects the experiences and evolving understanding of numerous individuals and organizations concerned with agricultural innovation including the World Bank This information is targeted to the key operational staff in international and regional development agencies and national governments who design and implement lending projects and to the practitioners who design thematic programs and technical assistance packages The sourcebook can also be an important resource for the research community and nongovernmental organizations NGOs *Monthly Catalogue, United States Public Documents* ,1985 **Whitaker's Book List** ,1991 *Intervention Effectiveness Research: Quality Improvement and Program Evaluation* Karen A.
