environmentally friendly

substances and products that do not have a negative effect on the environment.

- they are often cheaper to produce
- they often need less maintenance
- they are often stronger.

Biodegradable products are environmentally friendly

- Natural products can be broken down into their constituent elements.
- After a short time, they are re-absorbed by the Earth.
- A product that can be broken down like this is called biodegradable.
- Biodegradable products are environmentally friendly because they do not have a negative effect on the environment.

The need for biodegradable products

- Many plastics are not biodegradable, and they contribute directly to pollution.
- Human beings need to develop a plastic product that is biodegradable, to replace existing plastic products.

Biodegradable human-made packaging

- Human-made biodegradable packaging products contribute less pollution to the environment.

This is because such products:

- decay, or break down, naturally and they are able to form compost

- Biodegradable products are made from renewable sources of energy, such as corn-starch.
