Simon Sherratt,Nilanjan Dey,Amit Joshi,2023-08-31 This book gathers selected high quality research papers presented at the Eighth International Congress on Information and Communication Technology

held at Brunel University London on 20-23 February 2023. It discusses emerging topics pertaining to information and communication technology (ICT) for managerial applications, e-governance, e-agriculture, e-education, and computing technologies, the Internet of Things (IoT), and e-mining. Written by respected experts and researchers working on ICT, the book offers a valuable asset for young researchers involved in advanced studies. The work is presented in four volumes. **An Analysis of Two Decades of Educational Technology Publications** Gloria Natividad, J. Michael Spector, Nicholas Evangelopoulos, 2018-05-11. This book presents a challenging and multi-faceted research project that required state-of-the-art methodological approaches. The project involved analyzing data collected from 10,000 research articles published in ten leading journals in the area of educational technology over 20 years, from January 1994 to December 2014, using advanced analytic approaches such as latent semantic analysis and expert insights and interpretations of the subject matter. It captures the trends in a number of research streams within the discipline of educational technology and identifies the point in time when a massive change took place. This is a significant achievement given that in epistemology and philosophy of science there have always been discussions of paradigm shifts, but researchers have always identified them qualitatively. This is the first work to identify a paradigm shift using rigorous quantitative methods. The analysis procedure involved big data and sophisticated analysis, which supported the identification of clusters at several breakpoints from which the richest set was selected in order to provide the most detailed analysis. This comprehensive analysis also shows what has been published and by whom in those ten top-tier journals. This work makes a highly significant contribution to the field of learning technologies and provides the groundwork and a significant data source for other scholars, both new and experienced, to build on and expand in their work.

Proceedings of the 6th International Conference on Intelligent Computing (ICIC-6 2023) Ambeth Kumar Visvam Devadoss, Malathi Subramanian, Valentina Emilia Balas, Fadi Al-Turjman, Ramakrishnan Malaichamy, 2023-10-16. This is an open access book. PECTEAM, being held for a period of two days, aims to witness the development of technologies in all technical and management domains. The major event in the conference is paper presentations on the latest advances in Engineering and Management disciplines from National and International academic sectors. Special emphasis is given to update newer technologies by Keynote speakers. PECTEAM is a premier platform for researchers and industry practitioners to share their new and innovative ideas, original research findings, and practical development experiences in Engineering and Management through high-quality peer-reviewed papers. *Energy Research Abstracts*, 1992-04.
