*Interdisciplinary Approaches to AI, Internet of Everything, and Machine Learning* Pandey, Digvijay, Muniandi, Balakumar, Pandey, Binay Kumar, George, A. Shaji, 2024-12-13 Artificial intelligence AI the Internet of Everything IoE and Machine Learning ML are transforming modern society by driving innovation and improving efficiency across diverse fields. These technologies enable seamless connectivity, intelligent decision making and data driven solutions that address complex global challenges. From revolutionizing industries like healthcare, education and transportation to enhancing communication and resource management, their applications are vast and impactful. Interdisciplinary approaches are critical for unlocking their full potential, fostering collaboration across sectors to develop sustainable, ethical and inclusive solutions. As these technologies continue to shape the future, they hold the promise of advancing societal progress while addressing pressing issues. *Interdisciplinary Approaches to AI, Internet of Everything and Machine Learning* explores interdisciplinary approaches to harnessing AI, IoT and ML to address complex challenges and drive innovation across various fields. It emphasizes collaborative strategies to develop sustainable, ethical and impactful technological solutions for a rapidly evolving world. Covering topics such as artificial neural networks, management information systems and supply chain management, this book is an excellent resource for researchers, technologists, industry professionals, educators, policymakers and more. The Vortex Frank Uekötter, 2024-04-18 Environmental challenges are defining the twenty first century. To fully understand ongoing debates about our current crises: climate change, loss of biological diversity, pollution, extinction, resource woes, means revisiting their origins in all their complexity. With this ambitious, highly original contribution to the environmental history of global modernity, Frank Uekötter considers the many ways humans have had an impact on their physical environment throughout history. Ours is not a one way trajectory to sudden collapse, he argues, but rather death by a thousand cuts. The many paths we've forged to arrive in our current predicament, from agriculture to industry to infrastructure, must be considered collectively if we are to stay afloat in what Uekötter describes as a vortex, a powerful metaphor for the flow of history capturing the momentum and the many crosscurrents that swept people and environments along. His book invites us to look at environmental challenges from multiple perspectives, including all the twists and turns that have helped to create the mess we find ourselves in. Uekötter has written a world history for an age where things are falling apart, where we know what lies ahead and are equipped with the right tools, technological and otherwise, and plenty of experience to deal with environmental challenges but somehow fail to get our affairs in order. *The Routledge Handbook of Health Tourism* Melanie Kay Smith, László Puczkó, 2016-11-10 The Routledge Handbook of Health Tourism provides a comprehensive and cutting edge overview of the philosophical, conceptual and managerial issues in the field of health tourism, with contributions from more than 30 expert academics and practitioners from around the world.
