Input Devices

Anything connected to your computer is considered a **peripheral**. In order for a computer to work, it must first have data. You can use peripherals called **input devices** to put information into a computer.

A **keyboard** is one of the most common input devices. You can use a keyboard to enter information in the form of words, numbers, and punctuation. By pressing combinations of keys, you can also give commands to some programs.

You use a **mouse** to control objects you see on a computer screen. Using a mouse, you can point to objects, select objects, and move objects. You can open programs, delete files, and create new folders. A mouse allows you to give information to a computer in a variety of ways.
