Grades 6-8

### OVERVIEW

#### Spiraled Practice Including Class and Student Profiles

This document was created with all students in mind and provides teachers with sets of 3 spiraled questions to assess student mastery of the TEKS assessed on STAAR as well as Class and Student Profiles designed for recording and analysis of performance data. Each question in this document is correlated to a specific STAAR Category and TEKS.

This document provides both multiple choice and answer grid formats. However, the questions can easily be utilized without the multiple choice answers or answer grid. The questions are spiraled through all TEKS and pieces of TEKS that are eligible for assessment on STAAR. Twenty spirals are provided for each six weeks for a total of 120 Spiraled Practice sets.

**The spiraling of the questions takes into consideration the following information from the STAAR Mathematics Blueprint documents released from the TEA in January 2014:**

- The % of questions on each grade level STAAR that will assess Readiness Standards
- The % of questions on each grade level that STAAR will assess Supporting Standards
- The number of questions on each grade level STAAR that will be multiple choice format and 3 questions will be griddable format

The Profiles were designed to enable teachers and students to keep a record of mastery of all TEKS, not just the ones assessed on STAAR. Every question on each Spiraled Practice is correlated on the Profiles. Teachers keep a Class Profile to guide plans for instruction for each class they teach. Students keep a Student Profile so they will know their own individual strengths and weaknesses. Teachers view individual Student Profiles to guide plans for small group instruction and individualized tutorials.

**NOTE:** There is no answer key provided for this document, as the authors' philosophy is that each teacher should create a personalized Solutions Manual so the teacher becomes more familiar with the Revised TEKS and assessment of the Revised TEKS, as well as formulates various solution strategies for each question. Teachers are encouraged to communicate with the authors regarding discussion of any question in this document.
