 Ideas for Startup Signal, 2003 *Nondestructive Testing of Materials and Structures* Oral Büyüköztürk, Mehmet Ali  
 Taşdemir, 2012-09-09 Condition assessment and characterization of materials and structures by means of nondestructive  
 testing NDT methods is a priority need around the world to meet the challenges associated with the durability maintenance  
 rehabilitation retrofitting renewal and health monitoring of new and existing infrastructures including historic monuments  
 Numerous NDT methods that make use of certain components of the electromagnetic and acoustic spectrum are currently in  
 use to this effect with various levels of success and there is an intensive worldwide research effort aimed at improving the  
 existing methods and developing new ones The knowledge and information compiled in this book captures the current state  
 of the art in NDT methods and their application to civil and other engineering materials and structures Critical reviews and  
 advanced interdisciplinary discussions by world renowned researchers point to the capabilities and limitations of the  
 currently used NDT methods and shed light on current and future research directions to overcome the challenges in their  
 development and practical use In this respect the contents of this book will equally benefit practicing engineers and

researchers who take part in characterization assessment and health monitoring of materials and structures
