

2445/2465 Option 10 Instrument Interfacing Guide

INTRODUCTION

This Interfacing Guide is designed to help you quickly and easily get started using the 2445/2465 Option 10 Oscilloscope via the GPIB. It explains not only how to set up the instrument for GPIB operation, but also how to communicate with the oscilloscope using a variety of controllers. Sample programs for two types of controllers are also included. This document does not take the place of the operators manual or any other publication supplied with your oscilloscope or your system controller.

SETTING UP FOR GPIB OPERATION

After power-up sequencing is complete and the oscilloscope is in the normal operating mode, selection of GPIB parameters (primary address, message terminator, and talk-listen mode) can be made.

Primary Address

The selected GPIB address establishes both the primary talk and listen addresses for the oscilloscope. It can be set to any value between 0 and 31, inclusive.
