

The Second Amendment of The United States Constitution

The Second Amendment to the US Constitution was a historical amendment relating to the rights and responsibilities of the US citizens in bearing arms. The amendment was enacted as part of the Bill of Rights in the context of the first Ten Commandments in the Bill. With the support of the Virginia state legislature, the ratification of the amendment took place in December 1791. As per the provisions of the United States Supreme Court, the rights to hold and bear arms belong to the individuals. Also, the Supreme Court ruling stated that the rights were limited and did not prohibit regulation of firearms and similar devices. The Federal government, in infringing the firearms rights as per the Bill of Rights Incorporation, enjoys the same rights as the state and local governments.

The second amendment, swayed by the 1869 English-based Bill of Rights, was based on the partial right to bear and keep firearms as it was provided by the English Common law. According to English Judge, Sir William Blackstone, the rights to hold and bear firearms by US citizens were an auxiliary right for all. In this case, the weapons were meant for the fundamental right of personal defense, civic duty to act in defending the state and the resistance to oppression from the oppressors. Numerous cases have been determining in the Supreme Court over the years concerning the validity of states in banning of bearing and keeping the shotguns by the American citizens. This paper will dig deeper into that.

Text of the second amendment

The second amendment, which was passed by the Senate and House, was clear that the militia which was well-regulated was crucial to ensure the security of America was the basis of offering the rights to possess and bear firearms (Van Alstyne, pg. 1236-1255). The original language used to scribe the second amendment has created considerable debate on the intended scope that was aimed at the House and the Senate.

On the other hand, some legal experts are of the view that the 'the right of the people to bear and keep firearms' phrase was meant to give individual rights to the US citizens on holding and keeping firearms. As per the provisions of the 'individual rights theory', the legislative bodies in the USA are prohibited from restricting the possession of firearms. Further, the theory argues that any amendments that prohibit and restrictively regulate the right to hold and bear firearms by the US citizens are unconstitutional.

American politics However before the 1960s positions on firearms rights did not necessarily map onto partisan affiliation

What explains this drastic shift Patrick J Charles charts the rise of gun rights activism from the early twentieth century

through the 1980 presidential election pinpointing the role of the 1968 Gun Control Act Gun rights advocates including the

National Rifle Association had lobbied legislators for decades but they had cast firearms control as a local issue After the

assassination of President John F Kennedy in 1963 spurred congressional proposals to regulate firearms gun rights advocates

found common cause with states rights proponents opposed to civil rights legislation Following the enactment of the Gun

Control Act lawmakers on both sides of the aisle began to stake out firm positions Politicians including Richard Nixon and

Ronald Reagan recognized the potential of gun control as a wedge issue and gun rights became increasingly tied to the

Republican Party Drawing on a vast range of archival evidence Charles offers new insight into the evolution of the gun rights

movement and how politicians responded to anti gun control hardliners He examines in detail how the National Rifle

Association reinvented itself as well as how other advocacy groups challenged the NRA s political monopoly Offering a deep

dive into the politicization of gun rights *Vote Gun* reveals the origins of the acrimonious divisions that persist to this day
