Teaching and Studying Transnational Composition Christiane

Donahue, Bruce Horner, 2022-11-18 Transnational composition is a site for engaging with difference across populations, economies, languages and borders and for asking how cultures, languages and national imaginaries interanimate one another. Organized in three parts, the book addresses the transnational in composition in scholarship, teaching and administration. It brings together contributions from institutional, geopolitical and cultural contexts ranging across North America, Europe, Latin America, Africa, the Middle East, Asia and the Caribbean and covers writing in English, Chinese, multiple European languages, Latin American Spanish, African and West Indian Creoles and Guianan French. Exploring the relationship among transnational, international, global and translingual approaches to composition while complicating the term composition itself, essays draw on theories of border, work, mobility, liminality, cross-border interaction, center-periphery, contours, superdiversity and transnational rhetoric and address among other topics models of cognitive processing, principles of universal design and frames of critical literacy awareness. **Trends in Teaching and Learning of Mathematical Modelling** Gabriele
