The TMDL program has become controversial in part because of requirements and costs now facing states to implement this 30 year old provision of the law In 1999 EPA proposed regulatory changes to strengthen the TMDL program Industries cities farmers and others may be required to use new pollution controls to meet TMDL requirements EPA s proposal was widely criticised and congressional interest has been high This book explores the lingering dispute between states and industry groups beginning from the Clinton administration and stretching all the way to the present However Congress recognised in the Act that in many cases pollution controls implemented by industry and cities would be insufficient due to pollutant contributions from other unregulated sources **Preview of United States Supreme Court Cases ,2000**
