Alkali-Aggregate Reaction in Concrete Ian Sims,Alan Poole,2017-08-01 Alkali Aggregate Reaction in Concrete A World Review is unique in providing authoritative and up to date expert information on the causes and effects of Alkali Aggregate Reaction AAR in concrete structures worldwide In 1992 a first edition entitled The Alkali Silica Reaction in Concrete edited by Professor Narayan Swamy was published in a first attempt to cover this concrete problem from a global perspective but the coverage was incomplete This completely new edition offers a fully updated and more universal coverage of the world situation concerning AAR and includes a wealth of new evidence and research information that has accumulated in the intervening years Although there are various textbooks offering readers sections that deal with AAR deterioration and damage to concrete no other single book brings together the views of recognised international experts in the field and the

wealth of scattered research information that is available It provides a state of the art review and deals authoritatively with the mechanisms of AAR its diagnosis and how to treat concrete affected by AAR It is illustrated by numerous actual examples from around the world and comprises specialist contributions provided by senior engineers and scientists from many parts of the world The book is divided into two distinct but complementary parts The first five chapters deal with the most recent findings concerning the mechanisms involved in the reaction methods concerning its diagnosis testing and evaluation together with an appraisal of current methods used in its avoidance and in the remediation of affected concrete structures The second part is divided into eleven chapters covering each region of the world in turn These chapters have been written by experts with specialist knowledge of AAR in the countries involved and include an authoritative appraisal of the problem and its solution as it affects concrete structures in the region Such an authoritative compilation of information on AAR has not been attempted previously on this scale and this work is therefore an essential source for practising and research civil engineers consultant engineers and materials scientists as well as aggregate and cement producers designers and concrete suppliers especially regarding projects outside their own region
