

Grade 7 Fourth Quarter: LAYERS OF THE EARTH'S ATMOSPHERE

Name: _____

Year and Section: _____

Teacher: _____

Worksheet 3:

I. Directions: Analyze the graph and answer the following questions.

Altitude vs Temperature Graph

Guide Questions:

A. What happened to the temperature when altitude increases in the following layers of the atmosphere?

- | | | |
|-----------------|-------------|-------------|
| 1. Troposphere | A. increase | B. decrease |
| 2. Stratosphere | A. increase | B. decrease |
| 3. Mesosphere | A. increase | B. decrease |
| 4. Thermosphere | A. increase | B. decrease |

B. What is the basis used for dividing the atmosphere into different layers? A. altitude B. temperature

II. Directions: Determine which layer of the atmosphere is described by each characteristic listed below. Choose your answer from the word bank.

Troposphere	Stratosphere	Mesosphere
Thermosphere		Exosphere

- The meteors are burned up into smaller fragments.
- It contains the ozone layer.
- It is closest to the Earth's surface.
- The coldest layer.
- It is where the weather conditions occur.
- Airplanes can travel on this layer.
- The hottest layer.
- Outermost layer.
- It is where aurora borealis occur.
- Jet planes can fly on this layer.

BIG IDEA: Atmosphere is the layer of gases surrounding the Earth. It is composed of different layers based on its temperature.

Layers of the Atmosphere

The **Troposphere** is the layer closest to the earth's surface with an average height of 13 km. It is the region where almost all the weather conditions take place. Its temperature generally decreases with increasing altitude.

The **Stratosphere** has a very thin air and intensely heated by the sun's rays that is why the temperature increases with altitude. It starts just above the troposphere with an average height of 50 km above the earth's surface. It is the region where the ozone layer formed.

The **Mesosphere** is directly above the stratosphere, it extends from about 50 to 80 km. Its temperature decreases with increasing altitude and is considered as the coldest layer of the atmosphere. When meteors reached this layer, the meteors burned up into smaller fragments.

The **Thermosphere's** temperature increases extremely high with altitude. It is the region where the famous aurora borealis formed. The altitude range is about 85km to 500km.

The **Exosphere** is the outermost layer of the earth's atmosphere. It extends from the top of the thermosphere to 10,000 km above the earth.

III. DIRECTIONS: Label each layer with the appropriate name and write the correct temperature range and altitude range of each layer opposite their name. Choose your answer in the box below.

Layers of the Atmosphere

Temperature range

Altitude range

Layers

Temperature range

Altitude range

Thermosphere	-120°C - 2000°C	0km -13km
Troposphere	15°C - -60°C	50km -85km
Mesosphere	60°C - -15°C	13km -50km
Exosphere	15°C - 120°C	500km-10,000km
Stratosphere	0°C - 1700°C	85km-500km

Section 17 Atmosphere Teacher Guide Answers

**United States. Congress. Senate.

ASVAB STUDY GUIDE & PRACTICE TESTS 2025-2026 Craig T. Smith, Your ASVAB score isn't just a test result it's the key to your future in the U S Armed Forces This comprehensive 2025 2026 edition by Craig T Smith delivers everything you need to dominate the exam and secure your ideal military occupational specialty MOS Inside this all in one guide you'll discover Strategic Test Mastery Conquer CAT ASVAB adaptive testing with pacing tactics smart guessing techniques and stress management protocols 2 500 Realistic Questions Build test endurance with practice drills and full length exams mirroring current formats Branch Specific Guidance Tailored preparation for Air Force Navy Army and Marine Corps technical combat roles Core Subject Deep Dives Math Bootcamps algebra geometry Vocabulary Domination systems and Paragraph Comprehension tactics Technical Section Expertise Electronics schematics vehicle systems mechanical physics and spatial reasoning Digital Advantage Access flashcards quick reference formulas and performance tracking tools AFQT Optimization Precisely target the 4 critical subtests that determine enlistment eligibility Diagnostic Tools Identify weaknesses with baseline assessments and customized study plans Updated for 2025 requirements this independent guide features insider strategies not found in official materials From foundational arithmetic to advanced electronics each chapter transforms complex concepts into actionable steps with real world military applications Whether you're aiming for Special Operations Cyber Warfare Nuclear Engineering or Aviation roles this system provides the edge to maximize your score potential Includes registration checklists test day protocols and post exam career planning Your mission starts here Equip yourself with the knowledge to excel Disclaimer Not affiliated with or endorsed by the U S Department of Defense or military branches 2025 Craig T Smith All Rights Reserved *Nelson English - Book 3 Teacher's Guide* John Jackman, Wendy Wren, 2000 Each pair of units is supported by the Teachers Guide The Teachers Guide fully supports the programme giving all the guidance you need to help you pupils work through the two pupil books In the Teachers Guide there are suggestions for homework and independent study

EPA 608 Study Guide Mike L Turner, 2024-08-31 This comprehensive guide is designed for anyone preparing for the EPA 608 Certification exam offering an in depth exploration of key concepts and practical insights essential for passing the test Whether you are new to the HVAC field or looking to refresh

your knowledge this book provides a thorough understanding of refrigerant handling safety procedures and regulatory requirements The book begins with an overview of the EPA 608 Certification outlining the importance of this credential for HVAC professionals and detailing the different types of certification including Type I Type II Type III and Universal Each chapter is meticulously crafted to cover specific aspects of the certification process ensuring you are well prepared for every section of the exam Chapter by chapter you will delve into critical topics such as EPA regulations refrigerant types and their environmental impact and safety and handling procedures The book also provides a detailed breakdown of refrigerant recovery recycling and reclamation processes equipping you with the knowledge needed to handle various refrigerants responsibly and in compliance with regulations In addition to theoretical knowledge practical insights are provided through extensive practice questions and answers tailored to each certification type These practice questions are designed to help you assess your understanding and improve your test taking strategies Detailed explanations accompany each answer offering valuable insights into common pitfalls and effective problem solving techniques Special attention is given to exam strategies including time management tips and understanding the question format to ensure you approach the exam with confidence The book also addresses common pitfalls and offers last minute preparation tips to maximize your performance on the exam day This guide is not just a study aid but a comprehensive resource that supports your journey towards becoming a certified HVAC professional With its clear explanations practical advice and extensive practice material it prepares you for the challenges of the EPA 608 Certification exam and helps you build a strong foundation for a successful career in HVAC Perfect for both self study and supplementary use with formal training programs this book is an invaluable tool for achieving certification and advancing your expertise in the HVAC industry
