Papa, 2024-10-03 In recent years developing countries have seen the emergence of successful and innovative firms albeit often with state support Argentina which faces challenges including industrial decline and macroeconomic turbulence offers an intriguing context for studying latecomer firms as few have managed to innovate and compete globally without significant state backing This book examines why and how latecomer firms facing adverse policies and hostile macroeconomic conditions can nevertheless survive grow and catch up with global competitors while many other firms lag or fall further behind It presents on one hand a theoretical framework that builds on contributions made by Gerschenkron 1962 and Hobday 1995 on latecomer catch up in economic development theory and on those by Nelson 1991 2008 on firm level differences in evolutionary theory on the other it provides a contextual framework for the catching up experiences of firms from East Asia and Latin America which ends with a description of Argentina's main detrimental policy regimes over the past 50 years Further the book presents an statistical analysis of manufacturing firms performance along with the corporate characteristics that underlie it within the context of Argentina's worst economic crisis to determine which firm characteristics stood out during times of crisis e.g innovation and organizational capabilities To supplement the quantitative analysis and offer additional insights it introduces two in depth case studies on iconic latecomer firms TENARIS and IMPSA which bolstered by the examination of over nearly half a million newspaper articles illustrate their global success amidst numerous challenges It emphasizes the importance of long term corporate strategy a flexible organizational structure and a coherent set of technological and organizational capabilities while also addressing policy implications making it a valuable
