Day Trading Strategies for Beginners Steven Gray, Day trading as a lifestyle appeals to most people The fact that they can work from home put in only a few hours every day and take as many days off as they like makes it even more attractive You also do not need to ask your manager or employer for leave before you can spend time together with your family and friends You are in charge and you are responsible for all business decisions If you look at it critically such a way of living is alluring Of course if you also become an expert at day trading you have the potential to earn far more money each day than those in other professions you can make as much as thousands of dollars For example an individual or a company invests 15 000 in a mutual fund expecting a conservative annual return of 2% This would result in a total gain of 300 However if the same 15 000 is used by a skilled day trader to purchase stocks within a single day they could earn a remarkable profit of 8% by the end of the day amounting to 1 200 Consequently if the trader continues trading with the same level of proficiency it is possible to achieve profits significantly higher than 8% for a year This book has all the strategies you need to maximize your profit and avoid loss You will also learn how to trade in liquid markets These markets have sufficient trading volume to ensure ease of buying and selling positions without significant price fluctuations Slippage can be avoided while trading on liquid markets saving you hundreds or thousands of dollars

The Complete Guide to Investing in Commodity Trading and Futures Mary B. Holihan, 2008 Many people have become very rich in the commodity markets It is one of a few investment areas where an individual with limited capital can make extraordinary profits in a relatively short period of time Commodities are agreements to buy and sell virtually anything that is harvested except onions A 1958 federal law prohibits trading onions Such goods are raw or partly refined materials whose value mainly reflects the costs of finding or gathering them They are traded for processing or incorporation into final goods Examples are crude oil cotton rubber grains and metals and other minerals Since it is impractical to transport these bulky often perishable materials what is actually traded are commodities futures contracts or options that are agreements to buy or sell at an agreed upon price on a specific date Trading in futures and options is speculative in nature and there is a substantial risk of loss These investments are not suitable for everyone and only risk capital should be used As with many other business segments the Internet and technology have opened up this attractive marketplace to a new breed of individual investors and speculators working part time You and I can now stand on an even playing field with the largest banks wealthiest individuals and trading institutions from the comfort of home Commodity trading can provide you with very high secure rate of return in some cases as high as 12% 18% 24% or even 300% or more per year If performed correctly commodity trading will far outpace all other investments The key is to know how to perform this process correctly This all
