

## TECHNICAL DRAWING

### Ordinary and Higher Level Courses

**N.B.** The parts of the syllabus which are in *italics* will not be examined at Ordinary Level.

As a form of graphical communication Technical Drawing provides the student with the opportunity of visualising and comprehending information presented verbally or graphically. The present revised syllabus aims to develop intellectual qualities of comprehension, analysis and problem solving as well as the physical skills of manipulation and dexterity and the development of overall design sensitivity. Part I contains topics requiring conceptual knowledge of a purely theoretical form and providing a study in spatial perception where drawings are used in analysing and solving two and three-dimensional problems by rigorous application of geometrical principles. Part II emphasises the role of Technical Drawing as the language of technology and contains topics which involve varied and interesting applications to the type of problem encountered in modern technology. Thus the course is an educational experience in the broadest sense as it provides the students with a body of knowledge and develops their intellect and creative abilities in topics which are appropriate and meaningful in a technological world.

A knowledge of the Intermediate Certificate course in Mechanical Drawing is presumed but there will be no restriction on a pupil who has not followed the latter syllabus from taking the Leaving Certificate syllabus. In such a case it is presumed that the necessary arrangements will be made to enable a pupil to make up the leeway.

The examination will consist of two papers, and candidates must attempt Part I, Part II (A) and Part II (B).

The titles of the respective papers will be:

Part I	Plane and Solid Geometry
Part II (A)	Engineering Applications
Part II (B)	Building Applications

Part I and II will each be allowed 200 marks from the 400 assigned for this examination. Grading of results will be assessed by the aggregate of the marks obtained in both parts.

**Note:** Candidates studying Technical Drawing in the **Leaving Certificate Vocational Programme** may also study from the material in Appendix 1 as shown at the end of this section. Examination questions in relation to this appendix will be optional.
