### **Telecommunications Law Policy Third Edition:**

Telecommunications Law and Regulation in Nigeria Uchenna Jerome Orji, 2018-12-19 The Nigerian telecommunications industry has continued to grow in a phenomenal manner following market liberalization reforms that commenced in the 1990s. As of 2017, the telecommunications industry was one of the fastest growing economic sectors in Nigeria and the fourth largest contributor to the country's Gross Domestic Product. The telecommunications industry, however, remains a highly technical and naturally dynamic industry that has not been a usual area for legal research in developing countries such as Nigeria. This book bridges that gap in knowledge by providing an analysis of the legal and policy instruments that regulate the industry. It comprises eleven chapters that discuss the historical evolution of telecommunications and its regulation, the development of the Nigerian telecommunications industry from 1886 to 2017, the legal basis for the regulation of the industry, the licensing and duties of service providers, the regulation of network infrastructure, the protection of consumers, the regulation of competition, interconnection, universal access, and environmental protection, and the resolution of industry disputes. This book will be useful to policy makers, legislators, regulators, lawyers, law students, investors, operators, and consumers, as well as any person interested in the Nigerian telecommunications industry. International

Telecommunications Law and Policy Uchenna Jerome Orji, 2019-01-18 Since the revolution in modern telecommunications that followed the invention of the telegraph, telecommunication networks have provided channels for the fast delivery of communications across national borders. This transnational nature of telecommunication networks has led to the establishment of international regulatory regimes on the subject. On the other hand, developing countries consider regional economic integration as a major strategy for promoting trade and development; telecommunications have been seen within this context as a strategic tool for facilitating regional economic integration. This has also led to the establishment of regional telecommunication regulatory regimes that aim to promote regional integration and regulatory harmonization. This book discusses telecommunication regimes established by international and regional organizations such as the United Nations, the International Telecommunication Union, the World Trade Organization, the African Union, the Economic Community of West African States, and the Southern African Development Community, among a number of others. It will be relevant to policy makers, regulators, lawyers, law students, investors, and telecommunication operators, as well as any person interested in international and African regional telecommunication regimes. *Australian Telecommunications Regulation* Alasdair Grant, 2004 *Australian Telecommunications Regulation* provides an accessible but comprehensive review of Australia's telecommunications regulatory framework. Written by experienced insiders, it describes the laws and policies affecting competitors and consumers and the regulatory and self-regulatory bodies that administer them. The third edition features a new chapter on interconnection pricing and incorporates all recent legislative reforms and policy initiatives, including those affecting the telecommunications competition regime and discusses recent key decisions of the ACCC and other agencies.

*Telecommunications Law and Regulation* Ian Walden, 2012-09-13 Since the last edition of the book was published there have been a number of important developments in the telecommunications industry *Telecommunications Law and Regulation* takes these changes into account including an examination of the EU New Regulatory Framework as well as the establishment of the Body of European Regulators for Electronic Communications BEREC There are also new chapters on spectrum management radio frequencies and consumer protection rules The access and interconnection chapter addresses the issues surrounding the high capacity broadband widely provided by Next Generation Networks The chapter on licensing and authorisation has been refocused to reflect the increasing regulatory focus on the mobile sector The chapter on regulating content has also been significantly restructured and revised to reflect the changes in how we consume content Written by leading experts it is essential reading for legal practitioners and academics involved in the telecommunications industry
