

Tellabs® 5500 NGX-S Transport Switch

Overview

Reduce costs and migrate to a next-generation network with the Tellabs® 5500 NGX-S Transport Switch. The Tellabs 5500 NGX-S switch is your complete solution for bandwidth management. Tellabs can help you open new revenue streams, dramatically lower your capital and operating cost and simplify your migration into new service delivery. With the Tellabs 5500 NGX-S switch, service providers gain a high-density transport switch that can support 100 percent additional and bandwidth in one powerful, compact system.

The Tellabs 5500 NGX-S switch enables service providers to:

- Save more than 30 percent in CapEx and OpEx over current network deployments by fully integrating bandwidth management and transport functions.
- Shrink floor space by up to 75 percent compared to first-generation digital cross-connects and stacked AOMs.
- Achieve 100 percent nonblocking, protected switching of up to 320 STS-3c/OC-3s or 9,600 VTL-5/OC-1s in a single compact platform.

Features and Benefits

The Tellabs 5500 NGX-S switch is a multiservice multi-edge device that integrates highly scalable VTI/STS and MLI cross-connect technology and NG SONET transport. The full-duplex, fully protected packet switch core in the Tellabs 5500 NGX-S switch provides a flexible architecture.

The Tellabs 5500 NGX-S switch is unique in its versatility, combining the following key features:

- High-density transporting gateway
- Nonblocking STS-to-VTL/OC-1 level grooming across all interfaces
- Full transmultiplexing on all interfaces
- High-density interfaces — OC-3 to OC-48
- QoS-quality provisioning, test and maintenance functionality

The Tellabs 5500 NGX-S switch is a single-shelf architecture that supports up to 672 STS-3 equivalent grooming capacity (CEM) with 1+1 protection. This configuration provides nonblocking traffic switching up to the full system capacity, including end-to-end VTI/OC-1 switching with MLI transmultiplexing. This equates to 98,880 VTI/OC-1 equivalent grooming capacity in the Tellabs 5500 NGX-S system.

The Tellabs 5500 NGX-S switch combines integration of QoS, transport and data technology.

Speed Revenue Through Rapid Service Provisioning

The Tellabs 5500 NGX-S switch represents the next generation in service flexibility and provisioning. The fully universal slot architecture allows any-card-in-any-slot cabling, with no restrictions on traffic management options. This ensures straightforward planning, simple growth and 100 percent slot utilization without stranded, single-purpose slots. All slots have direct any-to-any connectivity at any circuit level from OC-3 to STS-48c. Every slot can support dense, high-speed optical connectivity with full end-to-end scalability into VT and even MLI OC-1 outputs for maximum traffic control, monitoring and maintenance.

For a product with full OC3-level performance, the Tellabs 5500 NGX-S switch offers an amazingly cost-effective solution, with optimally matched pay-as-you-grow bandwidth management scalability. Just one common equipment board type is all that's needed to support a single-shelf that can handle an 98,880 VTL-5 or OC-3 cross-connect capacity. With the crucial-level STS functionality distributed to the individual interface boards and perfectly matched for port speed and density, carriers need only pay for this cross-connect circuitry as they add port capacity.
