The ABCs of Autism in the Classroom Wendela Whitcomb Marsh,2018-06-15 What s the biggest challenge facing teachers today Behavior And which students present the

most baffling and unique behavior problems Our awesome kids on the autism spectrum We love them but it can be difficult to understand and deal with their challenging behaviors But behavior analysts aren't in the classroom teachers are And most teachers can't call a behavior analyst every time a behavior problem crops up Even when they do call in a behavior analyst they might not understand all that talk about the discriminative stimulus and the conditioned reinforcer It's all so dry and confusing Teachers don't have time to wade through all that jargon they're too busy teaching So what's a teacher to do when a student throws a chair or bites her hand or refuses to work It's up to teachers to figure out solutions before the behavior gets worse They need help The ABCs of Autism in the Classroom Setting the Stage for Success was written by a Board Certified Behavior Analyst who was also a teacher for many years as well as an autism mom Here you will find evidence based research supported behavioral tools presented in teacher friendly language You'll meet a virtual village of students with problem behaviors you might find in your own classroom You'll also read stories shared by kids and adults on the autism spectrum in their own words

AlphaGo Simplified Mark Liu, 2024-08-27 May 11 1997 was a watershed moment in the history of artificial intelligence AI the IBM supercomputer chess engine Deep Blue beat the world Chess champion Garry Kasparov It was the first time a machine had triumphed over a human player in a Chess tournament Fast forward 19 years to May 9 2016 DeepMind's AlphaGo beat the world Go champion Lee Sedol AI again stole the spotlight and generated a media frenzy This time a new type of AI algorithm namely machine learning ML was the driving force behind the game strategies What exactly is ML How is it related to AI Why is deep learning DL so popular these days This book explains how traditional rule based AI and ML work and how they can be implemented in everyday games such as Last Coin Standing Tic Tac Toe or Connect Four Game rules in these three games are easy to implement As a result readers will learn rule based AI deep reinforcement learning and more importantly how to combine the two to create powerful game strategies the whole is indeed greater than the sum of its parts without getting bogged down in complicated game rules Implementing rule based AI and ML in these straightforward games is quick and not computationally intensive Consequently game strategies can be trained in mere minutes or hours without requiring GPU training or supercomputing facilities showcasing AI's ability to achieve superhuman performance in these games More importantly readers will gain a thorough understanding of the principles behind rule based AI such as the MiniMax algorithm alpha beta pruning and Monte Carlo Tree Search MCTS and how to integrate them with cutting edge ML techniques like convolutional neural networks and deep reinforcement learning to apply them in their own business fields and tackle real world challenges Written with clarity from the ground up this book appeals to both general readers and industry professionals who seek to learn about rule based AI and deep reinforcement learning as well as students and educators in computer science and programming courses
