Each project is fully illustrated so you will see clearly what you are building as you create your own database-driven website. You will build a form for registering users and then build an interface so that an administrator can view and administer the user database. You will create a message board for users and a method for emailing them. You will also learn the best practices for ensuring that your website databases are secure. Later chapters describe how to create a product catalog and a simple e-commerce site. You will also discover how to migrate a database to a remote host.
