Mauricio César De Marzi, Marisa Mariel Fernandez, Ruben Dario Motrich, Matias

Ostrowski, 2024-10-17 In recent years the increase in knowledge about the functioning of the immune system has revealed not only its importance in the defense against external agents such as pathogens or toxins but also in the control of tumor cells and the importance of the processes of inflammation or immunological tolerance On the one hand all this knowledge has allowed a better understanding of the putative pathogenic consequences of immune system dysfunction which includes inflammatory autoimmune and immunosuppressive diseases among others On the other hand current knowledge about immunoregulation has paved the way to better prevent or control transplantation rejection However such mechanisms underlying immune dysregulation are highly variable depending on the type of pathology systemic chronic inflammatory diseases autoinflammatory diseases autoimmune disorders immunosuppression and on characteristics of the host such as sex genetics nutritional status etc Given the wide variety of pathologies that are a consequence of excessive inefficient or inadequate induction of immune responses the study of factors involved in the dysregulation of the immune system has gained great attention during the last decades

Defense Management Reform

Peter Levine, 2020-03-10 Pentagon spending has been the target of decades of criticism and reform efforts Billions of dollars are spent on weapons programs that are later abandoned State of the art data centers are underutilized and overstaffed New business systems are built at great expense but fail to meet the needs of their users Every Secretary of Defense for the last five Administrations has made it a priority to address perceived bloat and inefficiency by making management reform a major priority The congressional defense committees have been just as active enacting hundreds of legislative provisions Yet few of these initiatives produce significant results and the Pentagon appears to go on as wasteful as ever In this book Peter Levine addresses why despite a long history of attempted reform the Pentagon continues to struggle to reduce waste and inefficiency The heart of Defense Management Reform is three case studies covering civilian personnel acquisitions and financial management Narrated with the insight of an insider the result is a clear understanding of what went wrong in the past and a set of concrete guidelines to plot a better future

S.-K. Ting,2019-10-14 This book reflects the current state of knowledge on sustainability in a wide range of fields from engineering to agriculture to education Though primarily intended to offer an update for experts and researchers in the field it can also be used as a valuable educational tool for relevant undergraduate and graduate courses Key aspects covered include the better and more responsible engineering and management of energy conversion processes the development of renewable energy technologies and improvements in conventional energy utilization and food production In addition the book addresses green buildings the green economy waste and recycling water ecopolitics and social sustainability *Can Green Sustain Growth?* John Zysman,Mark Huberty,2013-11-27 Green growth has proven to be politically popular but economically elusive Can Green Sustain Growth asks how we can move from theoretical support to implementation and argues that this leap will require radical experimentation But systemic change is costly and a sweeping shift cannot be accomplished without political support not to mention large scale cooperation between business and government Insightful and timely this book brings together eight original international case studies to consider what we can learn from the implementation of green growth strategies to date This analysis reveals that coalitions for green experimentation emerge and survive when they link climate solutions to specific problems with near term benefits that appeal to both environmental and industrial interests Based on these findings the volume delivers concrete policy recommendations for the next steps in the necessary shift toward sustainable prosperity

Although DOD has made progress toward establishing a management framework for overall business transformation the framework currently focuses on business systems modernization and does not fully address broader business transformation efforts In 2005 DOD set up the Defense Business Systems Management Committee to review and approve the business enterprise architecture a transformation blueprint and new business systems modernization investments It also established the Business Transformation Agency which currently reports to the Vice Chair of the Defense Business Systems Management Committee to coordinate and lead business transformation across the department Despite these steps DOD has not clearly defined or institutionalized interrelationships roles and responsibilities or accountability for establishing a management framework for overall business transformation For example differences of opinion exist within DOD about the roles of various senior leadership committees Until DOD s business transformation management framework is institutionalized and encompasses broad responsibilities for all aspects of business transformation it will be challenging for DOD to integrate related initiatives into a sustainable enterprise wide approach to successfully resolve weaknesses in business operations that GAO has shown are at high risk of waste fraud and abuse
