Workshop Statistics Allan J. Rossman, Beth L. Chance, Robin H. Lock, 2001-05-18 This book focuses on probability and the Bayesian viewpoint. It presents basic material on probability and then introduces inference by means of Bayes rule. The emphasis is on statistical thinking and how one learns from data. The objective is to present the basic tenets of statistical inference. Unique in its format, the text allows students to discover statistical concepts, explore statistical principles, and apply statistical techniques. In addition to the numerous activities and exercises around which the text is built, the book includes a basic text exposition for each topic and data appendices.

Controversies in Mission Rochelle Cathcart Scheuermann, Edward L. Smither, 2016-09-15 Crossing social, cultural, and religious barriers and making disciples of all nations has probably never been without some level of controversy. This book is an attempt to hit the pause button on this rapid-paced world and to reflect on how we do mission especially in light of the new layers of complexity that globalization brings. While the contributors engage in new aspects of mission and cultural encounter unique to the twenty-first century, the underlying issues of each chapter are age-old topics that have reared their heads at various times throughout history: priorities in mission, power struggles, perspectives on cultural others, and contextualization. With that in mind, our aims are twofold: 1. to carefully consider issues causing tension and contention within current mission thought, practice, and strategy; and then 2. to engage in serious but charitable dialogue for the sake of God's mission and the salvation of all peoples.
