Photosynthesis

How do light-dependent and light-independent reactions provide food for a plant?

Why?

Plants are the original solar panels. Through photosynthesis a plant is able to convert electromagnetic (light) energy into chemical energy. This energy is used not only to keep the plant alive, but also to sustain all creatures that rely on the plant for food and shelter. Plants and photosynthetic algae are also the source of all oxygen on Earth, allowing the inhabitants of Earth to benefit from our most plentiful renewable energy resource.

Model 1 – Chloroplast

Photosynthesis David Oakley Hall, Krishna Rao, 1999-06-24 The process of the conversion of sunlight into food by plants photosynthesis is fundamental to all life on this planet All students of biology need to understand this process in detail This book treats photosynthesis in a simple methodical manner and explains complex concepts in an interesting and user friendly way It helps the student to think practically about the subject and launches the reader towards the next stage in their understanding of plant biology Primary Processes of Photosynthesis, Part 1 Gernot Renger, 2007-11-29 This volume forms part of a two volume set and is not available for individual purchase Please view the complete pack ISBN 978 0 85404 364 4 for purchase options Photosynthesis R.P. Gregory, 2012-12-06 Photosynthesis the capture of light energy by living organisms is a simple enough concept but its investigation draws on the resources of disciplines from all fields of science The aim of this text is to provide a clear stimulating and essentially affordable coverage for undergraduate students of biology The activity of science is debate and practical experiment its product is a body of propositions which at any given time reflects the judgment and prejudices of those taking part The value of a proposition is related to the conceivable alternatives and writing it down without its context creates the false impression that science progresses by compilation of an increasing list of absolute truths It does not the facts and figures presented in the following pages have no intrinsic value unless they can be used by the reader to support an argument or point of view In short the reader is urged to respond So what to every item Secondly ideas like other foods should be date stamped science is inseparable from its history I have set out time charts to represent the evolution of our understanding in certain areas I have assumed that the reader is pursuing a course with a content of biochemistry microbiology and plant science or has access to basic texts I have assumed also that common methods such as spectrophotometry chromatography and electrophoresis as well as the techniques of molecular biology will be either part of the same course or in active use nearby **Photosynthesis** David W.
