

Unit 6 Lesson 18 Curated Practice Problems

1. Elena is designing a logo in the shape of a parallelogram. She wants the logo to have an area of 12 square inches. She draws bases of different lengths and tries to compute the height for each.

$$\frac{A}{b} = h$$

- a. Write an equation Elena can use to find the height, h , for each value of the base, b .

- b. Use your equation to find the height of a parallelogram with base 1.5 inches.

$$\frac{12}{1.5} = h$$

$$\boxed{8 \text{ in} = h}$$

$$\frac{A}{b} = h$$

2. Han is planning to ride his bike 24 miles.

- a. If he rides at a rate of 3 miles per hour, how long will it take?

$$\frac{24}{3} = 8$$

At 4 miles per hour?

$$\frac{24}{4} = 6 \text{ hr}$$

At 6 miles per hour?

$$\frac{24}{6} = 4 \text{ hr}$$

- b. Write an equation that Han can use to find t , the time it will take to ride 24 miles, if his rate in miles per hour is represented by r .

$$\frac{d}{r} = t$$

- c. On graph paper, draw a graph that shows t in terms of r for a 24-mile ride.

3. The graph of the equation $V = \frac{1}{10}s^3$ contains the points (2, 80) and (4, 640).

- a. Create a story that is represented by this graph.

Jey and Jhn each build a tower of 10 cubes. Juey's cubes have edge

$$V = s^3$$

- b. What do the points mean in the context of your story?

length 2 and Jhn's have edge length of 4. They use $V = 10s^3$ to compute the volume of their towers.

$$(2, 80)$$

edge volume

$$(4, 640)$$

Teaching and Learning High School Mathematics Charlene E. Beckmann, Denisse R. Thompson, Rheta N.

Rubenstein, 2009-11-02 Too many high school students faced with mathematics in courses at the level of algebra and beyond find themselves struggling with abstract concepts and unwilling to pursue further study of mathematics When students curtail their course taking in mathematics they may be impacting their college and career options Thus high school mathematics teachers have the responsibility to help students recognize the value and importance of mathematics while also designing instruction that makes mathematics accessible to all students Ball and Bass 2000 as well as other mathematics educators have recognized that mathematics teachers not only need to know mathematics content and mathematics pedagogy i e teaching strategies but they also need to know how these ideas are integrated This mathematical knowledge for teaching is the knowledge that teachers of mathematics need and it differs from the knowledge that research or applied mathematicians must know This text is designed to provide teachers with insights into this mathematical knowledge for teaching Teaching and Learning High School Mathematics is likely different from many other texts that you have used It integrates both content and pedagogy to help you develop and build your own understanding of teaching The text is designed to help you develop deep conceptual understanding of fundamental mathematics Ma 1999 so that you are able to approach mathematics from multiple perspectives with many tools Such flexibility in teaching is essential if teachers are to help all students become mathematically proficient Throughout this book you are encouraged to work in cooperative teams This strategy is designed to help you develop a mathematics learning community and build a professional network that will be a valuable resource during your professional career Hopefully you will experience the benefits of engaging in rich mathematical discussions with peers and consider how to encourage such learning environments in your own classrooms Lesson planning is another element pervasive throughout this text To help teachers plan for effective student centered lessons the Question Response Support QRS Guide is introduced in Lesson 1 1 and used throughout the remainder of the lessons The QRS Guide is a tool on which teachers may record tasks or questions Q for students expected and observed student responses R and teacher support S in the form of additional just enough questions to support students in their progress on the task In each unit teachers expand their repertoire of teaching and learning elements and strategies and incorporate these elements as they plan additional lesson segments In Unit 4 lesson planning is formally introduced as teachers put together elements from previous units into complete cohesive lesson plans GED Test Prep Plus 2020 Caren Van Slyke, 2019-12-03 Always study with the most up to date prep Look for GED Test Prep Plus 2021 ISBN 9781506266251 on sale December 01 2020 Publisher s Note Products purchased from third party sellers are not guaranteed by the publisher

D. Rivera,2015-06-17 This is a methods book for preservice middle level majors and beginning middle school teachers It takes a very practical approach to learning to teach middle school mathematics in an emerging Age of the Common Core State Standards The Common Core State Standards in Mathematics CCSSM is not meant to be the official mathematics curriculum it was purposefully developed primarily to provide clear learning expectations of mathematics content that are appropriate at every grade level and to help prepare all students to be ready for college and the workplace A quick glance at the Table of Contents in this book indicates a serious engagement with the recommended mathematics underlying the Grade 5 through Grade 8 and traditional pathway Algebra I portions of the CCSSM first with issues in content practice assessment learning teaching and classroom management pursued next and in that order In this book we explore what it means to teach to the CCSSM within an alignment mindset involving content practice learning teaching and assessment The Common Core state content standards which pertain to mathematical knowledge skills and applications have been carefully crafted so that they are teachable learnable coherent fewer clearer and higher The practice standards which refer to institutionally valued mathematical actions processes and habits have been conceptualized in ways that will hopefully encourage all middle school students to engage with the content standards more deeply than merely acquiring mathematical knowledge by rote and imitation Thus in the CCSSM proficiency in content alone is not sufficient and so does practice without content which is limited Content and practice are both equally important and thus must come together in teaching learning and assessment in order to support authentic mathematical understanding This blended multisourced text is a getting smart book It prepares preservice middle level majors and beginning middle school teachers to work within the realities of accountable pedagogy and to develop a proactive disposition that is capable of supporting all middle school students in order for them to experience growth in mathematical understanding that is necessary for high school and beyond including future careers **Catalog of Copyright Entries** ,1936 *GED Test Prep 2024-2025* Kaplan Publishing,2023 An official online prep guide to the GED Test provides more than 1 000 practice questions essential reviews of all GED subjects strategies for writing the RLA extended response and two full length practice tests
