Farmers on Welfare Ann-Christina L. Knudsen,2011-03-15 In 2007 the farm subsidies of the European Union s Common Agricultural Policy took over 40 percent of the entire EU budget How did a sector of diminishing social and economic importance manage to maintain such political prominence The conventional answer focuses on the negotiations among the member states of the European Community from 1958 onwards That story holds that the political priority given to the CAP as well as its long term stability resides in a basic devil s bargain between French agriculture and German industry In *Farmers on Welfare* a landmark new account of the making of the single largest European policy ever Ann Christina L Knudsen suggests that this accepted narrative is rather too neat In particular she argues it neglects how a broad agreement was made in the 1960s that related to national welfare state policies aiming to improve incomes for farmers Drawing on extensive archival research from a variety of political actors across the Community she illustrates how and why this supranational farm regime was created in the 1960s and also provides us with a detailed narrative history of how national and European administrations gradually learned about this kind of cooperation By tracing how the farm welfare objective was gradually implemented in other common policies Knudsen offers an alternative account of European integration history *Glassroom Learning* Jason Mills,2023-07-31 Christian higher education institutions across North America are experimenting with radical shifts in educational content and delivery Cyber education is becoming a common supplement or replacement for embodied learning especially since the global coronavirus pandemic Most theological educators have embraced the shift online finding ways to leverage technology to enhance teaching very few consider how technology itself impacts theological students particularly those being educated for pastoral ministry What effect do shifts toward online courses have on those enrolled in programs of pastoral formation Are future ordinands being adequately trained When developed well Web based learning can

strengthen intellectual virtues However it can also inhibit character virtue formation and self differentiation Internet usage has been shown to negatively affect social well being resulting in higher rates of anxiety depression and isolation in students furthermore it alters behavior making learners more distracted less empathetic and less able to concentrate and contemplate Theological schools should therefore articulate clearer standards for student formation and strengthen aspects of embodied learning to prepare clergy for ministry in an increasingly complex church and world **Resources in Education** ,2001
