

SKYSCAN ATOMIC CLOCK

Model 88825 Instruction Manual

Congratulations on purchasing the jumbo LCD wall clock. The utmost care has gone into the design and manufacture of your clock. Please read these instructions carefully and store them in a safe place for future reference.

FEATURES

- Precise Atomic Time display
- Four separate time zones: Eastern, Central, Mountain or Pacific
- Calendar shows Month, Day & Date
- Temperature shows in °F or °C
- Alarm clock and snooze function
- Displays time in 12 or 24 hour format
- Daylight Saving Time function (DST)
- Indoor temperature

BATTERY INSERTION / REPLACEMENT

- Remove the battery compartment cover on the back of the clock.
- Insert three "AA" batteries into the battery compartment. Make sure the polarity is correct by following the (+ or -) symbols engraved inside.
- Do not mix old and new batteries or batteries of different brands.

RECEIVING RADIO SIGNALS AUTOMATICALLY

- After inserting the batteries, the display will be activated, but the clock will not operate or set for the first four minutes. During this time, it will automatically search for the WWVB time signal, and the antenna icon  will flash.
- While the clock is searching for the WWVB time signal, the "WAVE/+" button can be pressed to stop the search for the WWVB time signal.
- If the WWVB signal has been received successfully, the antenna icon  will display continuously and the display will show the default time, date, and weekday.

STARTING THE SIGNAL SEARCH MANUALLY

In normal time display mode, you can also manually start the reception of the WWVB time signal any time: Press and hold the "WAVE/+" button for 2 seconds. The antenna  icon flashes until the clock has successfully received the WWVB time signal and a solid antenna icon  will display on the LCD screen.

NOTE: During the search for the WWVB time signal, the setting function will not operate! This is normal and not a defect in your clock.
