are often hard to come by in industrial settings As an alternative learning methods and models are called for which integrate other sources of knowledge in order to compensate for the lack of data This is where the principle of Informed Machine Learning comes into play Informed Machine Learning combines purely data driven learning and knowledge based techniques to learn from both data and knowledge This has several advantages It reduces the need for data it often results in smaller less complex and more robust models and even makes machine learning applicable in settings where data is scarce The kind of knowledge to be incorporated into learning processes can take many different forms for example differential equations analytical models simulation results logical rules knowledge graphs or human feedback which makes the approach overall very powerful and widely applicable

Einstein's Pathway to the Special Theory of Relativity Galina

Weinstein,2015-06-18 This book pieces together the jigsaw puzzle of Einstein's journey to discovering the special theory of relativity Between 1902 and 1905 Einstein sat in the Patent Office and may have made calculations on old pieces of paper that were once patent drafts One can imagine Einstein trying to hide from his boss writing notes on small sheets of paper and according to reports seeing to it that the small sheets of paper on which he was writing would vanish into his desk drawer as soon as he heard footsteps approaching his door He probably discarded many pieces of papers and calculations and flung them in the waste paper basket in the Patent Office The end result was that Einstein published nothing regarding the special theory of relativity prior to 1905 For many years before 1905 he had been intensely concerned with the topic in fact he was busily working on the problem for seven or eight years prior to 1905 Unfortunately there are no surviving notebooks and manuscripts no notes and papers or other primary sources from this critical period to provide any information about the crucial steps that led Einstein to his great discovery In May 1905 Henri Poincaré sent three letters to Hendrik Lorentz at the same time that Einstein wrote his famous May 1905 letter to Conrad Habicht promising him four works of which the fourth one Relativity was a rough draft at that point In the May 1905 letters to Lorentz Poincaré presented the basic equations of his 1905 Dynamics of the Electron meaning that at this point Poincaré and Einstein both had drafts of papers relating to the principle of relativity The book discusses Einstein's and Poincaré's creativity and the process by which their ideas developed The book also explores the misunderstandings and paradoxes apparent in the theory of relativity and unravels the subtleties and creativity of Einstein
