

Oracle Utilities Network Management Business Intelligence

Pre-built dashboards provide insights into your distribution grid to help you increase grid efficiency and cut restoration time.

Out of the Box Value

Oracle Utilities Network Management Business Intelligence uses three outstanding pre-built dashboards to address vital network management issues:

- Oracle Utilities Outage Analytics
- Oracle Utilities Advanced Spatial Outage Analytics
- Oracle Utilities Distribution Analytics

These products help managers and executives grasp and analyze vital distribution grid metrics during normal operations and during unplanned outages.

Addressing Outages

During an outage, Oracle Utilities Network Management System equips Storm Center engineers and dispatchers with the tools they need to manage complex, evolving, and often life-threatening situations.

But staff and executives outside the Storm Center also play important outage-management roles involving resource allocation and communications with external audiences. Oracle Utilities Outage Analytics and Oracle Utilities Advanced Spatial Outage Analytics provide the decision support they need—graphs and maps that spotlight trends, compare statistics in an ongoing outage's history versus parallel distributions, outage details, and monitor changes in reliability statistics. Executives can develop a clear picture of the dimensions of current and past outages, including their effects on customers and on utility operations. And communications staff can convey the dimensions of current outages to first responders, customers, and the media.

Oracle Utilities Outage Analytics

Outage Analytics pre-built dashboards include:

- Overview. This dashboard focuses on current outages. It summarizes the number of current outage events, total number of customers impacted, and average outage duration. This dashboard also provides information on critical customers affected, the progress of restoration, and the causes of current outages.

KEY FEATURES

- Displays outage and distribution grid data as charts, timelines, maps, and other graphics right out of the box.
- Uses Oracle Business Intelligence (OBI), the industry-leading, comprehensive, enterprise platform that offers guided and ad hoc analytics, advanced reporting and publishing, and the ability to invoke business processes.
- Provides near real-time updates during outages.
- Filters drill-downs into current outage performance details.
- Provides decision support for executives and staff.
- Incorporates standard reliability measurements.
- Supports very large data volumes.
- Features easy configuration, extension, and upgrade.

KEY BENEFITS

- Speeds and improves the quality of executive-level outage and distribution decisions.
- Improves outage communications with first responders, public officials, media, customers, and regulators during and after the event.
- Streamlines end-to-end of business intelligence implementations and upgrades.
- Minimizes training costs.
