**Integrative Learning of Theory and Practice** Mariana Orozco, 2022-02-14 This book addresses the questions of what constitutes the integrative learning of theory and practice ILTP and how this learning progresses over time these are important questions that have been overlooked to date It introduces a new way of looking at the theory practice integration and presents the

conceptual and empirical research that has led to such a view The conceptualisation of the ILTP and the description of the phenomenon of integration draw on psychological aspects of epistemological beliefs in TVET and on philosophical aspects of social reasoning In this inferentialist non dualistic epistemological perspective theory and practice are distinguished in terms of their use in reasoning rather than as intrinsically different forms of knowledge In particular the integrative learning is presented in terms of qualitative changes in chains of reasoning that connect theoretical and practical considerations This work represents a contribution to further educational research as it advances a novel operationalisation of the inferentialist framework Finally this work contributes to educational practice as it offers evidence based guidelines for practitioners concerned with instructional design in TVET The reported empirical investigations involved in depth qualitative research methods and were conducted at a micro level of instruction in alternating school based and work based programmes in the field of Chemicals Processing Technology CPT Solution Processing of Inorganic Materials David Mitzi, 2008-12-22
