ALKANES

Physical Properties

- Hydrocarbons, dispersion forces, non-polar, not miscible w/water, low density
- sp^3 hybridized carbon: C-C, C-H bonds, electronegativity, MO theory & orbitals
- m.p.: odd/even effect
- b.p. C1-4: gases, C5-17: liquids, C18 and up: solids
- linear, branched, cyclics, chirality (incl. optical activity, D/L, R/S, d/l , $+/-$),
- non-equivalent carbons
- isomers: constitutional, conformational isomers, stereo-isomers
- naming: special groups:
 - o Me, Et, Pr, Bu
 - o iPr, iBu, sec-Bu, tBu
 - o neopentyl

Task: Name compounds 1 and 2; identify any chiral centers and # of chemically non-equivalent carbons; where would the compounds absorb in IR in UV-vis? Identify the participating orbitals.

- Rotational/conformational isomers = conformations
 - o eclipsed
 - values: H/H, CH₃/H, CH₃/CH₃
 - o staggered, anti, gauche
 - value: gauche: CH₃/CH₃

Task: draw an energy rotational energy plot (360°) for pentane along C2-C3 bond

- Cycloalkanes:
 - o Spiro, fused, bridged: naming
 - o Heats of combustion: ring strains (angle, torsional, sterics)
 - o Cis/trans
 - o 1,3-diaxial interactions
 - value H/CH₃
 - o Ring-flip for cyclohexane

Annual Catalogue United States Air Force Academy, 1984 *United States Air Force Academy* United States Air Force Academy, **10 Things You Must Know About The International Chemistry Olympiad (Icho): A Guide To The Icho Competition (Revised Edition)** I-jy Chang, Fun Man Fung, 2023-02-17

This is a book dedicated to special groups in the community whom we reach out to promote chemistry interest and learning chemistry. It will be immensely useful to students, parents who are interested in Science Olympiads, Chemistry Olympiad chemistry instructors at the secondary and collegiate level, and other science instructors at the secondary and collegiate level. This is a one of a kind book that details the behind the scenes preparation and trainings that students undergo in various countries. It will enable the effective promotion of chemistry in your respective countries and around the globe.

Organic Chemistry Education Research into Practice Jay Wackerly, Sarah Zingales, Michael Wentzel, Gautam Bhattacharyya, Brett McCollum, 2025-03-25. This Research Topic has three main goals: 1. provide a platform for instructors of organic chemistry to showcase evidence based methods and educational theories they have utilized in their classrooms; 2. build new and strengthen existing connections between educational researchers and practitioners; and 3. highlight how people have used chemical education based research in their teaching practice. There are places in the literature dedicated for chemical education research (CER), however, there is not a clear avenue for those that have changed their teaching methods based on published CER and report their experiences. Creating this article collection will foster collaboration between chemical education researchers and teachers of organic chemistry. This opportunity allows these instructors to share evidence based practices, experiences, challenges, and innovative approaches from CER literature and beyond. This Research Topic bridges discipline based education research and the scholarship of teaching and learning, which will help advance organic chemistry education and improve student outcomes.

Specifications Grading 2.0 Linda B. Nilson, Joseph A. Packowski, 2025-09-15. This second edition of the alternative grading classic revisits specs grading with a robust body of research exemplars and strategies to elevate the quality of student work, increase engagement, and buy in, reduce faculty stress, and cultivate students' career competencies. Nilson and Packowski present the unique characteristics of the specs grading schema, all of which simplify faculty decision making, reduce antagonism between the evaluator and the evaluated, and increase student receptivity to meaningful feedback, thus facilitating a mutually beneficial, rigorous learning process. Used consistently over time, specs grading can restore credibility to grades by demonstrating and making transparent to all stakeholders the learning outcomes that students achieve. This book features five new chapters stemming from firsthand accounts of dozens of instructors actively using specs grading and new material in six of the remaining eight chapters. It lays out the surprisingly simple transition process, positioning specs grading as the most viable and easy to use system available to faculty.

Grading for Growth David Clark, Robert Talbert, 2023-07-03. Are you satisfied with your current and traditional grading system? Does it accurately reflect your

students learning and progress Can it be gamed Does it lead to grade grubbing and friction with your students The authors of this book two professors of mathematics with input from colleagues across disciplines and institutions offer readers a fundamentally more effective and authentic approach to grading that they have implemented for over a decade Recognizing that traditional grading penalizes students in the learning process by depriving them of the formative feedback that is fundamental to improvement the authors offer alternative strategies that encourage revision and growth Alternative grading is concerned with students eventual level of understanding This leads to big changes Students take time to review past failures and learn from them Conversations shift from why did I lose a point for this to productive discussions of content and process Alternative grading can be used successfully at any level in any situation and any discipline in classes that range from seminars to large multi section lectures This book offers a comprehensive introduction to alternative grading beginning with a framework and rationale for implementation and evidence of its effectiveness The heart of the book includes detailed examples including variations on Standards Based Grading Specifications Grading and ungrading of how alternative grading practices are used in all kinds of classroom environments disciplines and institutions with a focus on first hand accounts by faculty who share their practices and experience The book includes a workbook chapter that takes readers through a step by step process for building a prototype of their own alternatively graded class and ends with concrete practical time tested advice for new practitioners The underlying principles of alternative grading involve Evaluating student work using clearly defined and context appropriate content standards Giving students helpful actionable feedback Summarizing the feedback with marks that indicate progress rather than arbitrary numbers Allowing students to revise without penalty using the feedback they receive until the standards are met or exceeded This book is intended for faculty interested in exploring alternative forms of learning assessment as well as those currently using alternative grading systems who are looking for ideas and options to refine practice

Student Curriculum Evaluation Committee,1969 *Learning Gross* William C. Forbes III,2024-01-11 About the Book *Learning Gross* presents the core concepts of how to succeed as a student or professor in an essential Gross Anatomy class Dr Forbes goes where no one else has gone to the inner workings of an excellent Human Anatomy course and describes in detail the rare experience of a semester spent exploring the human body *Learning Gross* is a valuable tool for succeeding in a Gross Anatomy class In felicitous prose it is a meditation on what it takes to present and receive an excellent Anatomy course deftly assembled and stuffed with facts and information Those concepts are presented with clarity in a comprehensive format for easy reference by the reader If you are a professor this book can transform the way you present your class If you re a student how will you approach the sheer volume of information presented in a Gross Anatomy course This book will help you retain the content of the course throughout your matriculation and into your clinical practice The book discusses learning the

physical anatomy Then with an imaginative wit it presents between each two chapters a little of the metaphysical embodied in a trenchant conversation with one of the donor bodies in his laboratory Unlike other books about cadaver courses written by laypeople attending a Gross Anatomy course this book is written by an academic who has spent his life in that milieu It is a special perspective one that equips the writer to present you with practical authentic advice on what it takes to succeed

Excerpt from the Book For most people what s inside the body is a great mystery Haven t you found that to be so Most people entertain vague ideas about where organs are located what they do and how they work But for those of us who study human gross anatomy it s different For those of us who have the splendid opportunity to explore the body for ourselves to actually see for ourselves the beauty and grace inside the human body and to learn its secrets in order to better serve our patients it s a compelling once in a lifetime revelation Ours is a uniquely privileged study and that study would be impossible except for the unrequitable thoughtfulness of people we ve never met who had the charity to give to us what was their most intimate home for seventy eighty ninety years We begin that study as strangers strangers to the human body and strangers to each other and we invariably finish as good friends to both I m happy you haven t missed this rare opportunity And someday when you re really old twenty thirty forty years after you graduate when you ve achieved your goals and you are a practicing healthcare professional you will have occasion to get a whiff of formaldehyde and that will cause you to remember You ll remember the Anatomy Lab the names of your lab partners and instructors and your donor body And you ll reflect on what is called the music of the Anatomy Laboratory the sound of learning the sound of discovery the sound of students teaching other students all throughout the room And you will recall that lovely aroma in the lab And here s the thing when you remember you will smile I promise you will

Visualization in Science Education John K. Gilbert, 2006-03-30 Visualization in Science Education draws on the insights from cognitive psychology science and education by experts from Australia Israel Slovenia UK and USA It unites these with the practice of science education particularly the ever increasing use of computer managed modelling packages especially in chemistry The first section explores the significance and intellectual standing of visualization The second section shows how the skills of visualization have been developed practically in science education This is followed by accounts of how the educational value of visualization has been integrated into university courses in physics genomics and geology The fourth section documents experimental work on the classroom assessment of visualization An endpiece summarises some of the research and development needed if the contribution of this set of universal skills is to be fully exploited at all levels and in all science subjects
