Warhogs Stuart D. Brandes, 2021-12-14 The Puritans condemned war profiteering as a Provoking Evil George Washington feared that it would ruin the Revolution and Franklin D Roosevelt promised many times that he would never permit the rise of another crop of war millionaires Yet on every occasion that American soldiers and sailors served and sacrificed in the field and on the sea other Americans cheerfully enhanced their personal wealth by exploiting every opportunity that wartime circumstances presented In *Warhogs* Stuart D Brandes masterfully blends intellectual economic and military history into a fascinating discussion of a great moral question for generations of Americans Can some individuals rightly profit during wartime while others sacrifice their lives to protect the nation Drawing upon a wealth of manuscript sources newspapers contemporary periodicals government reports and other relevant literature Brandes traces how each generation in financing its wars has endeavored to assemble resources equitably to define the ethical questions of economic mobilization and to manage economic sacrifice responsibly He defines profiteering to include such topics as price gouging quality degradation trading with the enemy plunder and fraud in order to examine the different guises of war profits and the degree to which they have existed from one era to the next This far reaching discussion moves beyond a linear narrative of the financial schemes that have shaped this nation's capacity to make war to an in depth analysis of American thought and culture Those scholars students and general readers interested in the interaction of legislative economic social and technological events with the military establishment will find no other study that so thoroughly surveys the story of war profits in America

After Broadcast News Bruce A. Williams, Michael X. Delli Carpini, 2011-09-26 The new media environment has challenged the role of professional journalists as the primary source of politically relevant information *After Broadcast News* puts this challenge into historical context arguing that it is the latest of several critical moments driven by

economic political cultural and technological changes in which the relationship among citizens political elites and the media has been contested Out of these past moments distinct media regimes eventually emerged each with its own seemingly natural rules and norms and each the result of political struggle with clear winners and losers The media regime in place for the latter half of the twentieth century has been dismantled but a new regime has yet to emerge Assuring this regime is a democratic one requires serious consideration of what was most beneficial and most problematic about past regimes and what is potentially most beneficial and most problematic about today s new information environment *The Labor Question in America* Rosanne Currarino,2010-10-01 In *The Labor Question in America* Economic Democracy in the Gilded Age Rosanne Currarino traces the struggle to define the nature of democratic life in an era of industrial strife As Americans confronted the glaring disparity between democracy s promises of independence and prosperity and the grim realities of economic want and wage labor they asked What should constitute full participation in American society What standard of living should citizens expect and demand Currarino traces the diverse efforts to answer to these questions from the fledgling trade union movement to contests over immigration from economic theory to popular literature from legal debates to social reform The contradictory answers that emerged one stressing economic participation in a consumer society the other emphasizing property ownership and self reliance remain pressing today as contemporary scholars journalists and social critics grapple with the meaning of democracy in post industrial America **A Teacher's Guide to Land of Hope** Wilfred M. Forging a Laboring Race Paul R.D. Lawrie, 2018-04-03 How does it feel to be a problem asked W E B DuBois in The Souls of Black Folk 1903 For Progressive Era thinkers across the color line the Negro problem was inextricably linked to the concurrent labor problem occasioning debates regarding blacks role in the nation's industrial past present and future With blacks freed from what some believed to be the protective embrace of slavery many felt that the assumedly primitive Negro was doomed to expire in the face of unbridled industrial progress Yet efforts to address the so called Negro problem invariably led to questions regarding the relationship between race industry and labor In consequence a collection of thinkers across the natural and

social sciences developed a new culture of racial management linking race and labor to color and the body Evolutionary theory and industrial management combined to link certain peoples to certain forms of work and reconfigured the story of races into one of development and decline efficiency and inefficiency and the thin line between civilization and savagery Forging a Laboring Race charts the history of an idea race management building on recent work in African American labor and disability history to analyze how ideas of race work and the fit or unfit body informed the political economy of early twentieth century industrial America Forging a Laboring Race foregrounds the working black body as both a category of analysis and lived experience It charts a corporeal map of African American proletarianization via the fields factories trenches hospital and universities of Progressive Era America
