The work of Elinor and Vincent Ostrom represents a distinctive contribution to the study of political economy public policy and administration collective action and governance theory Efforts to present a comprehensive overview of the Bloomington School that grew around the Workshop in Political Theory and Policy Analysis now renamed the Ostrom Workshop which they founded more than 40 years ago received new impetus with the award of the Nobel Memorial Prize in Economic Science to Elinor Ostrom in 2009 Since then renewed attempts have been made to map the Ostroms contributions to theories of polycentric governance and collective action and to multi methods and comparative institutional analysis of ways of managing social and ecological systems common pool resources public economies and metropolitan reform The open ended and multiform nature of the Ostroms research program defies a single comprehensive overview yet it is a stimulus towards both creativity and disciplinary cross fertilization in social science research What sets this volume apart is that it brings together theory and practice models and work on the ground design and creativity empirics and norms to outline the significance of the Ostroms research program for the future Each contribution to the volume takes the Ostromian perspective as the point of departure amplifies it and explores the ground for future work by engaging with other approaches and areas of research with which the Bloomington School has some affinities This way of testing and extending the ideas and methods of the Ostroms is particularly appropriate since their research program initiated and nurtured through the Workshop has always been in between different fields and sub fields in the social sciences political science economics public administration law history anthropology cultivating a strong interdisciplinary way of doing research and exploiting the virtuous circle between theory analysis model building and empirical research Engaging in a creative dialogue with ideas and methods of other research programs is a way of sharpening one s analytic tools while renovating one s own vision of social research This volume is a way of thinking through and beyond the Bloomington School
