Do all cells have the same structure?

## Why?

An efficiency apartment is a one-room apartment. This one room is where you sleep, eat, shower, and entertain your guests. It all happens in one room. It is a simple way of living in a small space. A mansion is a large, complex living space with many separate rooms. There are rooms for cooking, eating, sleeping, bathing, reading, watching TV, entertaining guests, exercising, and storage. The rooms in a mansion are constructed for the specific things you would like to be able to do. You can live in simple efficiency or complexity. In this activity we will be looking at cells that are as simple as a one-room efficiency apartment or as complex as a mansion.

*Metal Recovery from Electronic Waste: Biological Versus Chemical Leaching for Recovery of Copper and Gold* Arda Işildar, 2018-10-30 Waste electrical and electronic equipment WEEE generation is a global problem Despite the growing awareness and deterring legislation most of the WEEE is disposed improperly i.e. landfilled or otherwise shipped overseas and treated in sub standard conditions Informal recycling of WEEE has catastrophic effects on humans and the environment WEEE contains considerable quantities of valuable metals such as base metals precious metals and rare earth elements REE Metal recovery from WEEE is conventionally carried out by pyrometallurgical and hydrometallurgical methods In this PhD research novel metal recovery technologies from WEEE are investigated Using acidophilic and cyanide generating bacteria copper and gold were removed

from crushed electronic waste with removal efficiencies of 98.4 and 44.0% respectively. The leached metals in solution were recovered using sulfidic precipitation and electrowinning separation techniques. Finally, a techno-economic assessment of the technology was studied. This research addresses the knowledge gap on two metal extraction approaches, namely chemical and biological, from a secondary source of metals. The essential parameters of the selective metal recovery processes, scale-up potential, techno-economic and sustainability assessment have been studied.
