Promises And Lies:

*Promises and Lies, Ub40 (cd). Ub40**, Existence: what it is and what we think it is Victor Senchenko,2017-01-31 Existence what it is and what we think it is engages logic and rational to expose and explain the defects of human opinions and beliefs that came into existence from human imagination rather than any precise irrefutable knowledge including that of knowing exactly what makes humans human and knowing why everything that physically surrounds them on Earth and beyond always behaves within the states of physical reality and never any unreality Yet despite the seemingly overall human acceptance that physical existence on Earth and beyond constitutes physical reality even the slightest examination of human notions and beliefs including those accepted by science shows just how much these notions and beliefs endorse and uphold physical unreality The reason for such widespread acceptance of unreality amongst humans is due to their preference to believe the lies of those who advocate for their own selfish reasons that everything is possible and that the security of all humanity can be assured by means of belief in intangible entities of gods multi dimensions and time It may appear improbable that the intentions of Existence what it is and what we think it is to dismantle any of the erroneous notions and self deceptions has much chance of success considering how ingrained these beliefs are in human self awareness Still it is possible that the disclosures and explanations provided in the book may lead some readers to realize that the future of mankind depends not on the usual attitudes of selfish wants and desires but on unrestricted understanding of physical reality with all its limitations which can teach humanity to carefully manage not just its future existence but that of all other inhabitants on Earth in its care

Meta-Ethics and Normative Ethics H. J. McCloskey,2013-11-21 The purpose of this work is to develop a general theory of ethics which explains the logical status of moral judgments and the nature of the general principles which we should adopt and on the basis of which we should act The enquiry into the logical function of moral judgments is entered into as important in its own right and as a preliminary to the normative enquiry for it is on the basis of our conclusions in the area of meta ethics that we determine the appropriate method of reaching our normative ethic The approach followed in the meta ethical enquiry is that of examining theories of the past and present with a view to seeing why and in what respects they fall in particular what features of moral discourse are not adequately explained or accommodated by them A positive theory which seeks to take full account of these and other logical features of moral discourse is then developed in terms of a modified intuitionism of the kind outlined by W D Ross good being explained as the name of a consequential property right in terms of moral suitability and moral obligations as consisting in our being constrained to act in certain ways by facts we apprehend to constitute moral reasons which constrain us so to act

The Theory of Contract Law Peter Benson,2001-02-05 Although the law of contract is largely settled there appears to be no widely accepted comprehensive theory of its main principles and doctrines or of its normative basis Contract law theory raises issues concerning the relation between law and morality the role and the importance of rights the connection between justice and economics and the distinction between private and public law This collection of six full length essays written by some of the most eminent scholars in the field explores the general theory of contract law from a variety of theoretical perspectives The volume addresses a wide range of issues both methodological and substantive in the theory and practice of contract law While the essays build upon past theoretical contributions they also attempt to take contract theory further and suggest promising ways to develop theory of contract law
