United States. Small Business Administration,1972 *Ward's Business Directory of U.S. Private and Public Companies*
,2009 **The Wired Northwest** Paul W. Hirt,2012-10-18 The Pacific Northwest holds an abundance of resources for energy
production from hydroelectric power to coal nuclear power wind turbines and even solar panels But hydropower is king
Dams on the Columbia Snake Fraser Kootenay and dozens of other rivers provided the foundation for an expanding
regionally integrated power system in the U S Northwest and British Columbia A broad historical synthesis chronicling the
region s first century of electrification Paul Hirt s new study reveals how the region s citizens struggled to build a power
system that was technologically efficient financially profitable and socially and environmentally responsible Hirt shows that
every energy source comes with its share of costs and benefits Because Northwest energy development meant river
development the electric power industry collided with the salmon fishing industry and the treaty rights of Northwest
indigenous peoples from the 1890s to the present Because U S federal agencies like the Army Corps of Engineers and the U
S Bureau of Reclamation built many of the large dams in the region a significant portion of the power supply is publicly
owned initiating contentious debates over how that power should best serve the citizens of the region Hirt dissects these
ongoing battles evaluating the successes and failures of regional efforts to craft an efficient yet socially just power system
Focusing on the dynamics of problem solving governance and the tense relationship between profit seeking and the public
interest Hirt s narrative takes in a wide range of players not only on the consumer side where electricity transformed mills
mines households commercial districts urban transit factories and farms but also power companies operating at the local and
regional level and investment companies that financed and in some cases parasitized the operators His study also straddles
the international border It is the first book to compare energy development in the U S Northwest and British Columbia Both
engaging and balanced in its treatment of all the actors on this expansive stage The Wired Northwest helps us better
understand the challenges of the twenty first century as we try to learn from past mistakes and re design an energy grid for a
more sustainable future **Commerce Business Daily** ,1997-12-31 *Directory of Procurement Offices* United States.
