towards Supplying Off Grid Rural Villages in developing BRICS countries such as Africa India China and Brazil Off grid rural  
villages and isolated islands areas require mCHP and trigeneration solar power plants and associated isolated smart  
microgrid solutions to serve the community energy needs This article describes the development progress for such a system  
also referred to as solar polygeneration The system includes a sun tracker mechanism wherein a parabolic dish or lenses are  
guided by a light sensitive mechanism in a way that the solar receiver is always at right angle to the solar radiation Solar  
thermal energy is then either converted into electrical energy through a free piston Stirling or stored in a thermal storage  
container The project includes the thermodynamic modeling of the plant in Matlab Simulink as well as the development of an  
intelligent control approach that includes smart microgrid distribution and optimization The book includes aspects in the  
simulation and optimization of stand alone hybrid renewable energy systems and co generation in isolated or islanded

mechatronic sun tracking system that follows the sun progressing across the sky An intelligent energy management and  
adaptive learning control optimization approach is proposed for autonomous off grid remote power applications both for  
thermodynamic optimization and smart micro grid optimization for distributed energy resources DER The correct resolution  
of this load following multi objective optimization problem is a complex task because of the high number and multi
