follows with the era of good and bad nutritionism which set nutricentric dietary guidelines and defined the parameters of unhealthy nutrients and concludes with our current era of functional nutritionism in which the focus has shifted to targeted nutrients superfoods and optimal diets Scrinis s research underscores the critical role of nutrition science and dietary advice in shaping our relationship to food and our bodies and in heightening our nutritional anxieties He ultimately shows how nutritionism has aligned the demands and perceived needs of consumers with the commercial interests of food manufacturers and corporations Scrinis also offers an alternative paradigm for assessing the healthfulness of foods the food quality paradigm that privileges food production and processing quality cultural traditional knowledge and sensual practical experience and promotes less reductive forms of nutrition research and dietary advice
