Pyropolitics When The World Is Ablaze:

Pyropolitics Michael Marder, 2014-12-12 A highly original theory of the political the book explores the literal and metaphorical flare ups in political theology revolutionary thought radical protests and global energy production

Pyropolitics in the World Ablaze Michael Marder, 2020-11-09 From books and heretics burnt on the pyres of the Inquisition to self immolations at protest rallies from the burning of fossil fuels to inflammatory speech from the imagery of revolutionary sparks ready to ignite the spirits of the oppressed to car bombings and scorched earth policy fire proves to be an indispensable element of the political Pyropolitics in the World Ablaze builds upon the scintillating by turns horrifying and hopeful images and realities of flames hearths sparks immolations melting pots incinerations and burning in political thought and practices Relying on classical political theory theology philosophy literature and cinema as well as an analysis of current events Michael Marder argues that geo politics or the politics of the Earth has always had an unstable at once shadowy and blinding underside pyro politics or the politics of fire If this obscure double of geopolitics is increasingly dictating the rules of the game today then it is crucial to learn to speak its language to discern its manifestations and to project where our world ablaze is heading This new edition includes recent examples of the uses and accusations of incendiary speech both by Donald Trump and by European populist right and exploration of threats of global warming that have now reached a turning point in our collective relation to the dangers and promises of fire [Carl Schmitt Between Technological Rationality and Theology](#)

Hugo Herrera, 2020-06-01 Carl Schmitt one of the most influential legal and political thinkers of the twentieth century is known chiefly for his work on international law sovereignty and his doctrine of political exception This book argues that greater prominence should be given to his early work in legal studies Schmitt himself repeatedly identified as a jurist and Hugo E Herrera demonstrates how for Schmitt law plays a key role as an intermediary between ideal conceptual theory and the complexity of practical concrete situations Law is concerned precisely with balancing the extremes of theory and reality and in this respect Schmitt associates it with philosophical thinking broadly as being able to understand and explain the tensions in human experience Reviewing and analyzing prevailing interpretations of Schmitt by Jacques Derrida Heinrich Meier and others Herrera argues that the importance of Schmitt's legal framework is both significant and overlooked

Energy Dreams Michael Marder, 2017-03-21 The question of energy is among the most vital for the future of humanity and the flourishing of life on this planet Yet only very rarely if at all do we ask what energy is what it means what ends it serves and how it is related to actuality meaning making and instrumentality Energy Dreams interrogates the ontology of energy from the first coinage of the word *energeia* by Aristotle to the current practice of fracking and the popularity of energy drinks Its sustained multi disciplinary investigation builds a theoretical infrastructure for an alternative energy paradigm This study unhinges stubbornly held assumptions about energy conceived in terms of a resource to be violently extracted from the depths of the earth and from certain living beings such as plants converted into biofuels a thing that

teetering on the verge of depletion sparks off movement and is incompatible with the inertia of rest Consulting the insights of philosophers theologians psychologists and psychoanalysts economic and political theorists and physicists Michael Marder argues that energy is not only a coveted object of appropriation but also the subject who dreams of amassing it that it not only resides in the dimension of depth but also circulates on the surface that it activates rest as much as movement potentiality as much as actuality and that it is both the means and the end of our pursuits Ultimately Marder shows that instead of being grounded in utopian na vet the dreams of another energy to be procured without devastating everything in existence derive from the suppressed concept of energy itself *Ardeth #09* Felipe Hernández, 2022-12-06 Architecture is an inward looking discipline Its history conveys the norms of the discipline to an audience composed mostly of architects who are familiar with the work of their predecessors from whom they learnt or for whom they worked As such architecture singularises the multiple processes through which space is produced excluding difference in the pursuit of coherent narratives to sustain its authority and does so mainly through the figure of the architect For a long time now critics have shown how that figure is principally male However little has been said about the fact that the figure of the architect is also white a racial classification that refers not only to epidermal characteristics but to their national origin education and in most cases their class affiliation Heidegger's Black Notebooks Andrew J. Mitchell, Peter Trawny, 2017-09-05 From the 1930s through the 1970s the philosopher Martin Heidegger kept a running series of private writings the so called Black Notebooks The recent publication of the Black Notebooks volumes from the war years have sparked international controversy While Heidegger's engagement with National Socialism was well known the Black Notebooks showed for the first time that this anti-Semitism was not merely a personal resentment They contain not just anti-Semitic remarks they show Heidegger incorporating basic tropes of anti-Semitism into his philosophical thinking In them Heidegger tried to assign a philosophical significance to anti-Semitism with the Jew or world Judaism cast as antagonist in his project How then are we to engage with a philosophy that no matter how significant seems contaminated by anti-Semitism This book brings together an international group of scholars from a variety of disciplines to discuss the ramifications of the Black Notebooks for philosophy and the humanities at large Bettina Bergo Robert Bernasconi Martin Gessmann Sander Gilman Peter E Gordon Hans Ulrich Gumbrecht Michael Marder Eduardo Mendieta Richard Polt Tom Rockmore Peter Trawny and Slavoj Žižek discuss issues including anti-Semitism in the Black Notebooks and Heidegger's thought more broadly such as German conceptions of Jews and Judaism Heidegger's notions of metaphysics and anti-Semitism's entanglement with Heidegger's views on modernity and technology grappling with material as provocative as it is deplorable In contrast to both those who seek to exonerate Heidegger and those who simply condemn him and rather than an all or nothing view of Heidegger's anti-Semitism they urge careful reading and rereading of his work to turn Heideggerian thought against itself These measured and thoughtful responses to one of the major scandals in the history of philosophy unflinchingly take up the tangled and contested legacy of

Heideggerian thought **Handbook of the Anthropocene** Nathanaël Wallenhorst, Christoph Wulf, 2023-08-21 This Handbook is a collection of contributions of more than 300 researchers who have worked to grasp the Anthropocene this new geological epoch characterised by a modification of the conditions of habitability of the Earth for all living things in its biogeophysical and socio political reality These researchers also sought to define a historical and prospective anthropology that integrates social economic cultural and political issues as well as of course environmental ones What are the anthropological changes needed to ensure that our human adventure will be able to continue in the Anthropocene And what are the educational and political issues involved Anthropocene is fast becoming a widely used term but thus far there been no reference work explaining the thoughts of the greatest experts of the present day on this subject at the intersection of biogeophysical and socio political knowledge A scientific and political concept but which is also the conceptual vehicle for conveying the scientific community s sense of concern this complex term is explained by international experts as they reflect on scientific arguments taking place in earth system science the social sciences and the humanities What these researchers from different disciplines have in common is a healthy concern for the future and how to prepare for it in the Anthropocene and also the identification of possible anthropological changes This Handbook encourages readers to immerse themselves in reflections on the human adventure through descriptions of our differing heritages and the future that is in the process of being written **The Routledge Companion to Hermeneutics** Jeff Malpas, Hans-Helmuth Gander, 2014-11-20

Hermeneutics is a major theoretical and practical form of intellectual enquiry central not only to philosophy but many other disciplines in the humanities and social sciences With phenomenology and existentialism it is also one of the twentieth century s most important philosophical movements and includes major thinkers such as Heidegger Gadamer and Ricoeur The Routledge Companion to Hermeneutics is an outstanding guide and reference source to the key philosophers topics and themes in this exciting subject and is the first volume of its kind Comprising over fifty chapters by a team of international contributors the Companion is divided into five parts main figures in the hermeneutical tradition movement including Heidegger Gadamer and Ricoeur main topics in hermeneutics such as language truth relativism and history the engagement of hermeneutics with central disciplines such as literature religion race and gender and art hermeneutics and world philosophies including Asian Islamic and Judaic thought hermeneutic challenges and debates such as critical theory structuralism and phenomenology **The Phoenix Complex** Michael Marder, 2023-07-04

An innovative wide ranging consideration of the global ecological crisis and its deep philosophical and theological roots Global crises from melting Arctic ice to ecosystem collapse and the sixth mass extinction challenge our age old belief in nature as a phoenix with an infinite ability to regenerate itself from the ashes of destruction Moving from antiquity to the present and back Michael Marder provides an integrated examination of philosophies of nature drawn from traditions around the world to illuminate the theological mythical and philosophical origins of the contemporary environmental emergency From there he probes the

contradictions and deadlocks of our current predicament to propose a philosophy of nature for the twenty first century As Marder analyzes our reliance on the image and idea of the phoenix to organize our thoughts about the natural world he outlines the obstacles in the path of formulating a revitalized philosophy of nature His critical exposition of the phoenix complex draws on Chinese Indian Russian European and North African traditions Throughout Marder lets the figure of the phoenix guide readers through theories of immortality intergenerational and interspecies relations infinity compatible with finitude resurrection reincarnation and a possibility of liberation from cycles of rebirth His concluding remarks on a phoenix suffused philosophy of nature and political thought extend from the Roman era to the writings of Hannah Arendt

Senses of Upheaval Michael Marder, 2021-11-16 Spanning a decade of Michael Marder s contributions as a public intellectual *Senses of Upheavals* documents a period of exceptional global turmoil Thrown into mayhem by right wing populisms and a pandemic combined with skyrocketing economic inequalities and worsening environmental crises the world is on the verge of collapse Could revolutionary practical intellectual proposals to learn how to coexist from plants or to rethink the very meaning of energy chart the way to a better more livable and perhaps calmer world Nonetheless such proposals themselves constitute nothing short of an upheaval in philosophy plant sciences and environmental studies We are doomed to upheavals it seems the point is not to deflect but to choose judiciously among them

Heidegger and the Global Age Antonio Cerella, Louiza Odysseos, 2017-10-18 Globalization is one of the most contested and abused concepts of our time Whether one interprets it as a collective illusion or as the final stage of capitalism as uncontrollable multitude or as a radical opening of new spaces of freedom the global age represents the conceptual and existential background of our being in the world But what lies behind this process What mode of human existence is brought about by the age of technology and global mobilization And is it possible to attempt a unitary interpretation of this age that presents itself as both total and pluralistic This volume rethinks these epochal questions in light of Martin Heidegger s complex hermeneutics proposing at the same time that such questions enable the interrogation of some of its most fundamental aspects the metanarrative of *Seinsgeschichte* as withdrawal of Being the structure of human existence within the frame of technology the relation between humanism and nihilism as well as politics and technology the changing character of subjectivity in the age of the world picture the mythopoeic force of art and the uprooting of human beings As this volume shows interrogating Heidegger s thought has significant potential for both International Political Theory and also the analysis of specific concepts and dynamics in contemporary international studies such as the changing character of spatiality temporality and subjectivity

Eco-Deconstruction Philippe Lynes, David Wood, 2018-03-27 *Eco Deconstruction* marks a new approach to the degradation of the natural environment including habitat loss species extinction and climate change While the work of French philosopher Jacques Derrida 1930-2004 with its relentless interrogation of the anthropocentric metaphysics of presence has already proven highly influential in posthumanism and animal studies the present volume drawing on published and unpublished work by Derrida and others

builds on these insights to address the most pressing environmental issues of our time The volume brings together fifteen prominent scholars from a wide variety of related fields including eco phenomenology eco hermeneutics new materialism posthumanism animal studies vegetal philosophy science and technology studies environmental humanities eco criticism earth art and aesthetics and analytic environmental ethics Overall eco deconstruction offers an account of differential relationality explored in a non totalizable ecological context that addresses our times in both an ontological and a normative register The book is divided into four sections Diagnosing the Present suggests that our times are marked by a facile flattened out understanding of time and thus in need of deconstructive dispositions Ecologies mobilizes the spectral ontology of deconstruction to argue for an originary environmentality the constitutive ecological embeddedness of mortal life Nuclear and Other Biodegradabilities examines remains including such by products and disintegrations of human culture as nuclear waste environmental destruction and species extinctions Environmental Ethics seeks to uncover a demand for justice including human responsibility for suffering beings that emerges precisely as a response to original differentiation and the mortality and unmasterable alterity it installs in living beings As such the book will resonate with readers not only of philosophy but across the humanities and the social and natural sciences **Political Categories** Michael

Marder,2019-03-12 Western philosophy has been dominated by the concept or the idea the belief that there is one sovereign notion or singular principle that can make reality explicable and bring all that exists under its sway In modern politics this role is played by ideology Left right or center political schools of thought share a metaphysics of simplification We internalize a dominant largely unnoticeable framework oblivious to complex plural and occasionally conflicting or mutually contradictory explanations for what is the case In this groundbreaking work Michael Marder proposes a new methodology for political science and philosophy one which he terms categorial thinking In contrast to the concept no category alone can exhaust the meaning of anything categories are so many folds complications respectful of multiplicity Ranging from classical Aristotelian and Kantian philosophies to phenomenology and contemporary politics Marder s book offers readers a theoretical toolbox for the interpretation of political phenomena processes institutions and ideas His categorial apparatus encompasses political temporality and spatiality the revolutionary and conservative modalities of political actuality possibility and necessity quantitative and qualitative approaches to the study of political reality the meaning of political relations and various senses of political being Under this lens the political appears not as a singular concept but as a family of categories allowing room for new plural and often antagonistic ideas about the state the people sovereignty and power The Task of Philosophy in

the Anthropocene Richard Polt,Jon Wittrock,2018-04-06 In its early modern form philosophy gave a decisive impetus to the science and technology that have transformed the planet and brought on the so called Anthropocene Can philosophy now help us understand this new age and act within it The contributors to this volume take a broad historical view as they reflect on the responsibilities and possibilities for philosophy today The term Anthropocene signifies the era of the arrival of human

beings as a force that affects global ecosystems in ways that are potentially disastrous for humanity itself as well as for countless other species This volume explores whether philosophy has meaningful tasks to fulfill in this unparalleled situation Do philosophers need to reflect on new topics today Do they need to think in new ways Do they need new relationships to their own tradition And are there concrete actions they should take over and above philosophical reflection The contributors to this volume thus take on the question of the relevance and responsibility of philosophy drawing upon diverse legacies in the current global situation

The Cambridge Handbook of Environmental Sociology: Volume 2 Katharine Legun, Julie C. Keller, Michael Carolan, Michael M. Bell, 2020-12-03 The Cambridge Handbook of Environmental Sociology is a go to resource for cutting edge research in the field This two volume work covers the rich theoretic foundations of the sub discipline as well as novel approaches and emerging areas of research that add vitality and momentum to the discipline Over the course of sixty chapters the authors featured in this work reach new levels of theoretical depth incorporating a global scope and diversity of cases This book explores the broad scope of crucial disciplinary ideas and areas of research extending its investigation to the trajectories of thought that led to their unfolding This unique work serves as an invaluable tool for all those working in the nexus of environment and society

The Future of Meat Without Animals Brianne Donaldson, Christopher Carter, 2016-08-16 Plant based and cell cultured meat milk and egg producers aim to replace industrial food production with animal free fare that tastes better costs less and requires a fraction of the energy inputs These products are no longer relegated to niche markets for ethical vegetarians but are heavily funded by private investors betting on meat without animals as mass market environmentally feasible alternatives that can be scaled for a growing global population This volume examines conceptual and cultural opportunities entanglements and pitfalls in moving global meat egg and dairy consumption toward these animal free options Beyond surface tensions of meatless meat and animal free flesh deeper conflicts proliferate around naturalized accounts of human identity and meat consumption as well as the linkage of protein with colonial power and gender oppression What visions and technologies can disrupt modern agriculture What economic and marketing channels are required to scale these products What beings and ecosystems remain implicated in a livestock free food system A future of meat without animals invites adjustments on the plate but it also inspires renewed habits of mind as well as life affirming innovations capable of nourishing the contours of our future selves This book illuminates material and philosophical complexities that will shape the character of our future s of food

Toxic truths Thom Davies, Alice Mah, 2020-07-14 This electronic version has been made available under a Creative Commons BY NC ND open access license Debates over science facts and values are pivotal in the struggle for environmental justice For decades environmental justice activists have campaigned against the misuse of science engaging in community led citizen science that champions knowledge produced by and for ordinary people living with environmental risks and hazards However post truth politics have threatened science itself Toxic truths examines the relationship between environmental justice and citizen

science focusing on enduring issues and new challenges in a post truth age The volume features a range of community based participatory environmental health and justice research projects that seek to establish different ways of sensing witnessing and interpreting environmental injustice From struggles in American hog country and contaminated indigenous communities to local environmental controversies in Spain and China this volume examines political strategies for seeking environmental justice With international interdisciplinary contributions from distinguished authors emerging scholars and community activists *Toxic truths* is essential reading for those seeking to understand the cutting edge of citizen science and activism around the world

Narratives of Scale in the Anthropocene Gabriele Dürbeck, Philip Hüpkes, 2021-07-26 The Anthropocene concept draws attention to the various forms of entanglement of social political ecological biological and geological processes at multiple spatial and temporal scales The ensuing complexity and ambiguity create manifold challenges to widely established theories methodologies epistemologies and ontologies The contributions to this volume engage with conceptual issues of scale in the Anthropocene with a focus on mediated representation and narrative They are centered around the themes of scale and time scale and the nonhuman and scale and space The volume presents an interdisciplinary dialogue between sociology geography political sciences history and literary cultural and media studies Together they contribute to current debates on the re imagining of forms of human responsibility that meet the challenges created by humanity entering an age of scalar complexity Chapter 3 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license available at <http://www.taylorfrancis.com/books/e/9781003136989>

Portuguese Literature and the Environment Victor K. Mendes, Patrícia Vieira, 2019-06-03 Portuguese Literature and the Environment explores the relationship between Portuguese literature and the environment from Medieval times to the present From the centrality of nature in Medieval poetry through the bucolic verse of the Renaissance all the way to the Romantic and post Romantic nostalgia for a pristine natural or rural landscape under threat in the wake of industrialization Portuguese literature has frequently reflected on the connection between humans and the natural world More recently the postcolonial turn in contemporary literature has highlighted the contrast between the environment of the former colonies and that of Portugal Contributors to the collection examine how Portuguese writers engage with the environment and have incorporated nature in their texts not only to prompt social political or philosophical reflections on human society but also as a way to learn from non humans The book is organized into three sections The first explores the relationship between Portuguese philosophy historiography culture and environmental issues The second section discusses the link between literary texts and the environment from the Renaissance to 1900 The final section analyzes the connection between literary movements or specific authors and environmental change from 1900 to today Scholars of literature Latin American studies literature and environmental studies will find this volume especially useful

Solar Politics Oxana Timofeeva, 2022-01-19 This book is a philosophical essay on the sun It draws on Georges

Bataille's theories of the solar economy and solar violence and demonstrates their relevance to a world affected by the COVID 19 pandemic and climate change. The sun, which since Antiquity has played an essential role in our utopian imaginations, is the ultimate source of energy, both productive and destructive. According to Georges Bataille, its infinite generosity can be taken as the model for human societies, which suggests an alternative to the capitalist economy with its infinite expansion, colonization, and disastrous consequences on the cosmic scale. Taking a step from solar economy to solar politics, Timofeeva locates the grounds for it in solidarity with nature, treated neither as a master nor as a slave but as a comrade. The book will appeal to students, academics, artists, and other readers interested in the philosophy of nature, ecology, social and political theory, postcolonial and decolonial studies, and the humanities generally.

Embracing the Tune of Expression: An Mental Symphony within **Pyropolitics When The World Is Ablaze**

In some sort of eaten by screens and the ceaseless chatter of quick communication, the melodic elegance and psychological symphony created by the published word frequently diminish in to the backdrop, eclipsed by the constant noise and interruptions that permeate our lives. However, located within the pages of **Pyropolitics When The World Is Ablaze** a wonderful fictional prize overflowing with organic thoughts, lies an immersive symphony waiting to be embraced. Constructed by a masterful musician of language, that fascinating masterpiece conducts viewers on an emotional journey, well unraveling the concealed songs and profound affect resonating within each cautiously constructed phrase. Within the depths of the emotional examination, we shall investigate the book is key harmonies, analyze their enthralling publishing design, and submit ourselves to the profound resonance that echoes in the depths of readers souls.
