Knapsack Problems Hans Kellerer, Ulrich Pferschy, David Pisinger, 2013-03-19 Thirteen years have passed since the seminal book on knapsack problems by Martello and Toth appeared On this occasion a former colleague exclaimed back in 1990 How can you write 250 pages on the knapsack problem Indeed the definition of the knapsack problem is easily understood even by a non expert who will not suspect the presence of challenging research topics in this area at the first glance However in the last decade a large number

of research publications contributed new results for the knapsack problem in all areas of interest such as exact algorithms heuristics and approximation schemes Moreover the extension of the knapsack problem to higher dimensions both in the number of constraints and in the number of knapsacks as well as the modification of the problem structure concerning the available item set and the objective function leads to a number of interesting variations of practical relevance which were the subject of intensive research during the last few years Hence two years ago the idea arose to produce a new monograph covering not only the most recent developments of the standard knapsack problem but also giving a comprehensive treatment of the whole knapsack family including the siblings such as the subset sum problem and the bounded and unbounded knapsack problem and also more distant relatives such as multidimensional multiple multiple choice and quadratic knapsack problems in dedicated chapters "The" Athenaeum ,1890 **Operations Management** Richard Schonberger,Edward M. Knod,1994 **ISCONTOUR 2014 - Tourism Research Perspectives** Roman Egger,Christian Maurer,2014-05-02 Proceedings of the ISCONTOUR The aim of the International Student Conference in Tourism Research ISCONTOUR is thus to offer students a unique platform to present their research and to establish a mutual knowledge transfer forum for attendees from academia industry government and other organisations The annual conference which is jointly organised by the IMC University of Applied Sciences Krems and the Salzburg University of Applied Sciences will take place alternatively at the locations Salzburg and Krems The conference research chairs are Prof FH Dr Roman Egger Salzburg University of Applied Sciences and Prof FH Mag Christian Maurer University of Applied Sciences Krems The target audience include international students also PhDs graduates teachers and lecturers from the field of tourism and leisure management as well as companies and anyone interested in the conference topic areas Issues to be covered at the conference include the following areas within a tourism context Marketing Management Tourism Product Development Sustainability Information and Communication Technologies Advances in Construction ICT and e-Business Srinath Perera,Bingunath Ingirige,Kirti Ruikar,Esther Obonyo,2017-05-08 This internationally conducted study of the latest construction industry practices addresses a broad range of Information and Communication Technology applications Drawing on research conducted in the US and UK this book presents the state of the art of various ebusiness processes and examines BIM virtual environments and mobile technologies Innovation is a theme that runs throughout this book so in addition to the direct impact of these new technical achievements it also considers the management styles that helped them to emerge Examples from industry are illustrated with case studies and presented alongside research from some of the best known academics in this field This book is essential reading for all advanced students and researchers interested in how ICT is changing construction management and the construction industry **Supply Chain Management** Bowon Kim,2018-02-22 Offers a new learning perspective focuses on the organisational level and emphasises the systemic approach to supply chain management *Handbook of Portfolio Construction* John B. Guerard, Jr.,2009-12-12 Portfolio construction is fundamental to

the investment management process In the 1950s Harry Markowitz demonstrated the benefits of efficient diversification by formulating a mathematical program for generating the efficient frontier to summarize optimal trade offs between expected return and risk The Markowitz framework continues to be used as a basis for both practical portfolio construction and emerging research in financial economics Such concepts as the Capital Asset Pricing Model CAPM and the Arbitrage Pricing Theory APT for example provide the foundation for setting benchmarks for predicting returns and risk and for performance measurement This volume showcases original essays by some of today's most prominent academics and practitioners in the field on the contemporary application of Markowitz techniques Covering a wide spectrum of topics including portfolio selection data mining tests and multi factor risk models the book presents a comprehensive approach to portfolio construction tools models frameworks and analyses with both practical and theoretical implications

Machine Learning for Factor Investing Guillaume Coqueret, Tony Guida, 2023-08-08 Machine learning ML is progressively reshaping the fields of quantitative finance and algorithmic trading ML tools are increasingly adopted by hedge funds and asset managers notably for alpha signal generation and stocks selection The technicality of the subject can make it hard for non specialists to join the bandwagon as the jargon and coding requirements may seem out of reach Machine learning for factor investing Python version bridges this gap It provides a comprehensive tour of modern ML based investment strategies that rely on firm characteristics The book covers a wide array of subjects which range from economic rationales to rigorous portfolio back testing and encompass both data processing and model interpretability Common supervised learning algorithms such as tree models and neural networks are explained in the context of style investing and the reader can also dig into more complex techniques like autoencoder asset returns Bayesian additive trees and causal models All topics are illustrated with self contained Python code samples and snippets that are applied to a large public dataset that contains over 90 predictors The material is available online so that readers can reproduce and enhance the examples at their convenience If you have even a basic knowledge of quantitative finance this combination of theoretical concepts and practical illustrations will help you learn quickly and deepen your financial and technical expertise

Partial Least Squares Path Modeling Hengky Latan, Joseph F. Hair, Jr., Richard Noonan, 2023-11-14 Now in its second edition this edited book presents recent progress and techniques in partial least squares path modeling PLS PM and provides a comprehensive overview of the current state of the art in PLS PM research Like the previous edition the book is divided into three parts the first part emphasizes the basic concepts and extensions of the PLS PM method the second part discusses the methodological issues that have been the focus of recent developments and the last part deals with real world applications of the PLS PM method in various disciplines This new edition broadens the scope of the first edition and consists of entirely new original contributions again written by expert authors in the field on a wide range of topics including how to perform quantile composite path modeling with R the rationale and justification for using PLS PM in top tier journals psychometric properties of three weighting schemes and why PLS PM

is a better fit to mode B a comprehensive review of PLS software how to perform out of sample predictions with ordinal consistent partial least squares multicollinearity issues in PLS PM using ridge regression theorizing and testing specific indirect effects in PLS and considering their effect size how to run hierarchical models and available approaches and how to apply necessary condition analysis NCA in PLS PM This book will appeal to researchers interested in the latest advances in PLS PM as well as masters and Ph D students in a variety of disciplines who use PLS PM methods With clear guidelines on selecting and using PLS PM especially those related to composite models readers will be brought up to date on recent debates in the field

Practical Business Statistics Andrew F. Siegel, 1994

Practical Business Statistics 5 e was written in response to instructors not wanting a formula driven mathematically encyclopedic book The use of computer applications means some topics no longer require coverage in detail This allows future managers to know how to use and understand statistics The text does this by using examples with real data that relate to the functional areas of business such as finance accounting and marketing It de emphasizes the theoretical and presents the material in a well written easy style designed to motivate students The emphasis is on understanding and applications as opposed to mathematical precision and formula detail
