offers an integrated approach that allows the reader to choose the most appropriate and robust techniques to apply to each situation. Many entries treat traditional topics in a novel way stimulating both interest and new perspectives. One example is the entry *Econometrics* by Professor Damodar Gujarati. Following a process which many educators preach but seldom practice, Gujarati walks the reader twice through the research process from economic theory to data and models to analysis, once in principle and a second time with an example. In using the ordinary process of economic research to achieve an extraordinary impact, he leaves the reader thinking not only about methods and models but also the fundamental purpose of econometrics.

Topics Covered: Analysis of Variance, Association and Correlation, Basic Qualitative Research, Basic Statistics, Causal Modeling, Structural Equations, Discourse, Conversation Analysis, Econometrics, Epistemology, Ethnography, Evaluation, Event History, Analysis, Experimental Design, Factor Analysis, Related Techniques, Feminist Methodology, Generalized Linear Models, Historical Comparative, Interviewing in Qualitative Research, Latent Variable Model, Life History, Biography, Loglinear Models, Categorical Dependent Variables, Longitudinal Analysis, Mathematics and Formal Models, Measurement Level, Measurement Testing, Classification, Multiple Regression, Multilevel Analysis, Qualitative Data Analysis, Sampling in Surveys, Sampling in Qualitative Research, Scaling, Significance Testing, Simple Regression, Survey Design, Time Series.

Key Features: Over 900 entries arranged A to Z. Each entry is written by a leading authority in the field covering both quantitative and qualitative methods. Covers all disciplines within the social sciences. Contains both concise definitions and in-depth essays. Three volumes and more than 1500 pages.
