should be relevant to four other groups teacher educators curriculum developers state and national policy makers and test developers and others involved with assessment Taken as a whole the chapters reflects the mathematics education research community s willingness to accept the challenge of helping the public understand what mathematics education research is all about and what the relevance of their research fi ndings might be for those outside their immediate community      **Using Rubrics for Performance-Based Assessment** Todd Stanley, 2021-10-03 Writing a rubric that can accurately evaluate student work can be tricky Rather than a single right or wrong answer rubrics leave room for interpretation and thus subjectivity How does a teacher who wants to use performance based assessment in this day and age of educational data and SMART goals find a way to reliably assess student work The solution is to write clear rubrics that allow the evaluator to objectively assess student work This book will show classroom teachers not only how to create their own objective rubrics which can be used to evaluate performance assessments but also how to develop rubrics that measure hard to assess skills such as leadership and grit and how to empower their own students to create rubrics that are tailored to their work
