Rural Europe Identity And Change

Gert-Jan Hospers

Rural Europe Identity And Change:

Rural Europe Keith Hoggart, Henry Buller, Richard Black, 1995 This book examines the interaction at national and international level of the economic political and social change processes within Europe that are bringing about fundamental transformations in rural areas Although such changes are experienced at a local level they are heavily imbued with a national tone given that European nations possess distinctive visions of their rural areas These rural identities set limits within which economic political and social agents can act Yet these limits are constantly being subjected to strain particularly with the globalization of economic activity and the strengthening impetus for integrated EC policies

Housing in the European Countryside Nick Gallent, Mark Shucksmith, Mark Tewdwr-Jones, 2003 This book reviews international experience of housing pressure in rural areas in a number of countries

Rural Europe Keith Hoggart, Richard Black, Henry Buller, 2014-02-25 Examines the interaction of the economic political and social change processes within Europe which are bringing about fundamental transformations in rural areas The authors expand on this view of rural Europe and place its significance within the broader field of rural studies

The Geography of Rural Change Brian W. Ilbery, 2014-09-11 The Geography of Rural Change provides a thorough examination of the processes and outcomes of rural change as a result of a period of major restructuring in developed market economies After outlining the main dimensions of rural change the book progresses from a discussion of theoretical insights into rural restructuring to a consideration of both the extensive use of rural land and the changing nature of rural economy and society The text places an emphasis on relevant principles concepts and theories of rural change and these are supported by extensive case study evidence drawn from different parts of the developed world The Geography of Rural Change is written for undergraduates taking courses in human geography agricultural geography rural geography rural sociology planning and agricultural economics

The Oxford Handbook of Postwar European History Dan Stone, 2012-05-17 The postwar period is no longer current affairs but is becoming the recent past As such it is increasingly attracting the attentions of historians Whilst the Cold War has long been a mainstay of political science and contemporary history recent research approaches postwar Europe in many different ways all of which are represented in the thirty five chapters of this book As well as diplomatic political institutional economic and social history The Oxford Handbook of Postwar European History contains chapters which approach the past through the lenses of gender espionage art and architecture technology agriculture heritage postcolonialism memory and generational change and shows how the history of postwar Europe can be enriched by looking to disciplines such as anthropology and philosophy The Handbook covers all of Europe with a notable focus on Eastern Europe Including subjects as diverse as the meaning of Europe and European identity southern Europe after dictatorship the cultural meanings of the bomb the 1968 student uprisings immigration Americanization welfare leisure decolonization the Wars of Yugoslav Succession and coming to terms with the Nazi past the essays in this Handbook offer an unparalleled coverage of postwar European history that offers far more than the standard

Cold War framework Readers will find self contained state of the art analyses of major subjects each written by an acknowledged expert as well as stimulating and novel approaches to newer topics Combining empirical rigour and adventurous conceptual analysis this Handbook offers in one substantial volume a guide to the numerous ways in which historians are now rewriting the history of postwar Europe

The City's Hinterland Keith Hoggart, 2016-03-16 Despite the fact that the rural commuter belts of cities are major loci of population change economic growth and dynamic social change within city regions most research tends to ignore this area while focusing on the built up city core However with the current emphasis on the role of rural areas in policy debates it is vital to recognize the importance of the commuter belt By comparing four major European cities in England France Germany and Spain this book offers the first comparative investigation of the dynamism of city rural hinterlands It assesses whether rural areas will become effectively integrated into quality of life improvements as a result of their inter dependencies with cities focusing on the critical arenas of employment change housing and service provision In doing so it investigates how change in these three fields impact on the quality of life and physical environment of rural hinterlands

Agriculture in Mediterranean Europe Dionisio Ortiz Miranda, Eladio Vicente Arnalte Alegre, Ana Maria Moragues Faus, 2013-06-25 This volume illustrates and deepens the understanding of current agrarian dynamics developing in Mediterranean countries in the light of recent theoretical contributions The book compiles and analyses a set of Mediterranean case studies that show the range of transformations shaping contemporary agriculture in Southern Europe

European Landscapes in Transition Teresa Pinto-Correia, Jørgen Primdahl, G. Bas M. Pedroli, 2018-01-25 A presentation of the challenges of European rural landscape management exploring alternatives that incorporate place based approaches

Shaping Rural Areas in Europe Luís Silva, Elisabete Figueiredo, 2013-06-17 Shaping Rural Areas in Europe Perceptions and Outcomes on the Present and the Future sets out to investigate the effect of urban perceptions about the rural and consequent demands on rurality on the present and future configurations of rural territories in Europe in the early twenty first century This volume presents and discusses a broad range of case studies and theoretical and methodological approaches from different academic fields mainly Anthropology Sociology and Geography

Environmental Politics in Southern Europe K. Eder, M. Kousis, 2012-12-06 Europe is sometimes credited with a polis but not a demos Political integration and economic globalisation cannot diminish local identity and social memories This fascinating collection of national case studies shows why there will always be a local demos located in ecology economy and society But there will never be a transnational demos precisely because locality is the basis for meaningful sustainability Long may it triumph Tim O Riordan CSERGE University of East Anglia The book offers a refreshing perspective on the diversity of Europe and at the same time on the interdependence of the policies economies and societies of European countries Going beyond the dichotomies of good and bad and leaders and laggards in environmental matters the authors contribute to a different understanding of the North South divide in the process of European integration Angela Liberatore

European Commission Directorate General for Research This is a self consciously revisionist volume whose findings are theoretically significant policy relevant and timely Its insistence on bringing society back in its debunking of the notion of a Mediterranean syndrome its emphasis on developmental leapfrogging capacity of late comers to emerge as leaders in contexts of late modernity and its systematic attempt to reconceptualize the politics of Europeanization should be carefully listed to students and policy makers concerned with collective action Southern Europe European integration and environmental politics P Nikiforos Diamandouros University of Athens

The New Dimensions of the European Landscapes R.H.G Jongman,2005-05-09 The European Landscape is under stress of changing land use and a changing attitude of its users Globalization the disappearance of the iron curtain and the recent EU enlargement to 25 countries have changed the economic and environmental dimensions of Europe Europe is changing its face from a western and eastern part to one European Union and to fast connections between its centres of activity The rural and cultural heritage of Europe has to be adapted to cope with this change However its landscape is worth to be conserved as well because it represents the European history in the same way as castles and churches It even more represents the history of the common people because it has been the tradition of the rural population that made these landscapes It cannot be prevented that Europe is changing and it is good that Europe adapts to the new dimensions of the world We in Europe have to define what we think is important and what must be conserved what can be adapted to be used for new functions and what can be abolished because it has no value These decisions will determine the new dimensions of the European landscapes The Frontis Workshop on the New Dimensions of the European Landscape was held on 10 12 June 2002 Wageningen University and Research Centre organized this workshop aiming to develop visions on the landscape in Europe its development and design in the future and to strengthen the international network in landscape planning

The International Yearbook of Environmental and Resource Economics 2000/2001 Tom Tietenberg,Henk Folmer,2000-05-25 There has been an explosion in the literature and research on environmental and resource economics in recent years This major annual publication provides a cutting edge survey of current research by the leading experts in the field

Rural Tourism and Recreation Lesley Roberts,Derek Hall,2001-01-01 This book reviews the theory and practice of tourism and recreation in rural areas in Europe Including numerous case studies 9 chapters cover the changing nature of recreation and tourism provision in rural areas the emergence of sustainability in the development debate the different levels of policy influencing recreation and tourism development and emphasizing the connectedness between local and global processes the role and influence of the local community in recreation and tourism changing patterns of tourism consumption the changing nature of tourism supply and the processes relating to the convergence of supply and demand

Regional Economic Change in Europe Gert-Jan Hospers,2004 In this era of ongoing globalization a coherent vision on Europe s changing geo economy is more important than ever before Drawing on the work of Schumpeter Fourasti e and Perroux the book at hand offers a new and policy

oriented perspective on regional economic change in Europe Conceptually it develops a middle range theory by extending Schumpeter's vision with a sectoral and spatial dimension This neo Schumpeterian framework is concretized by exploring fifty years of structural change in Sardinia the Ruhrgebiet and the resund **Europe's Green Ring** Leo Granberg, Imre Kovách, 2017-07-05 Around the fringe of Europe lies a green ring of countries which have followed different pathways into modernity from the industrial core of the continent and have until recently been characterized by a strong agrarian presence in their politics economy and culture This book brings together case studies from both the post socialist countries and EU member states which make up the green ring to compare experiences of rural and agricultural groups It provides a fascinating opportunity to identify similarities and contrasts in the ways in which these countries have managed their rural areas when faced with the challenges set by industrialization political integration and globalization The book focuses on agrarian transformation as de and sometimes re peasantization referring to the changing economic social cultural and political positions of farmers and food production workers It also problematizes the standard rural models and opens up discussion of the problems these models pose for the farmers of the green ring countries **Winning and Losing** Doris Schmied, 2022-05-05 Instigated by technological and political change Europe's rural areas have undergone profound and all pervasive restructuring processes Although the impact of these processes has often been depicted negatively this is not always the case Bringing together a range of comparative case studies from France Finland Germany Greece Ireland Spain Sweden Portugal the UK and other countries this book provides a comprehensive and balanced picture of rural change over the past five decades It explores which aspects of the European countryside have benefited and which have suffered as a consequence of the often contradictory forces of restructuring The book looks into economic aspects as well as into the social impact of rural change The final part examines regional issues and illustrates how different rural areas have responded to the transformative pressures **Environmental Issues in the Mediterranean** John B. Thornes, John Wainwright, 2004-03-01 The Mediterranean has been subject to changing human settlement and land use patterns for millennia and has a history of human exploitation in an inherently unstable landscape Environmental Issues in the Mediterranean reviews both physical and social aspects of this region in relation to its environment Ideal for students who are studying a range of environmental issues but want to see them linked within one regional context The book begins with an introduction to the Mediterranean region its history physical and human geography and its environmental problems It then goes on to examine The Dynamic Environment climate variables and fluctuations vegetation the hydrological cycle of the basin and its watershed processes of erosion fire and the Mediterranean Sea The Human Impact on the Environment prehistoric and historic land use traditional agriculture rural and urban settlement and use of mineral resources The Mediterranean Environment Under Increasing Pressure the present human landscape changes in agriculture in the 20th century the impact of depopulation pollution water resources desertification and potential climatic change It then concludes with a discussion of the region's on going

environmental issues of water resources land degradation agricultural intensification and tourism and considers how these can be approached using management techniques and national and regional policies **Routledge International**

Handbook of Rural Studies Mark Shucksmith, David L. Brown, 2016-05-20 Rural societies around the world are changing in fundamental ways both at their own initiative and in response to external forces The Routledge International Handbook of Rural Studies examines the organisation and transformation of rural society in more developed regions of the world taking an interdisciplinary and problem focused approach Written by leading social scientists from many countries it addresses emerging issues and challenges in innovative and provocative ways to inform future policy This volume is organised around eight emerging social economic and environmental challenges Demographic change Economic transformations Food systems and land Environment and resources Changing configurations of gender and rural society Social and economic equality Social dynamics and institutional capacity Power and governance Cross cutting these challenges are the growing interdependence of rural and urban the rise in inequality within and between places the impact of fiscal crisis on rural societies neoliberalism power and agency and rural areas as potential sites of resistance The Routledge International Handbook of Rural Studies is required reading for anyone concerned with the future of rural areas Rural Sustainable Development in the Knowledge Society Dr Hilary Tovey, Dr Karl Bruckmeier, 2012-11-28 Based on the EU funded CORASON research project this volume brings together and compares studies into rural and sustainable development processes in 12 European countries In doing so it identifies key trends and reveals the changing nature of development processes on the way towards a knowledge society The book examines the differences between the preconditions and contexts relevant to rural development strategies and those relevant to sustainable development strategies It explores whether the concept goals and nature of rural development is better understood and adopted by rural actors than those of sustainable development Finally by focusing on the ideas and practices of sustainable resource management a component in both rural and sustainable development objectives it links with knowledge used by actors involved in rural development *Geographies of Agriculture* Guy Robinson, 2014-01-14 Agricultural Geography has changed dramatically in recent decades reflecting the transformation of the farming industry itself Geographies of Agriculture embraces these changes applying ideas and methods from contemporary social science as it moves beyond farm based production to address current issues affecting the production and consumption of food and fibre throughout the world The book places special emphasis on topics that reflect globalisation processes integration of agriculture into the wider agri food system concern with attaining sustainable production systems and the importance of both government and supra government policies Examples are drawn from North America Western Europe and the developing world Geographies of Agriculture will appeal especially to Geography students but should also be of interest to a broader range of students in Sociology Economics and Development Studies and anyone interested in agriculture food production and consumption and rural development
