*Nokia Firewall, VPN, and IPSO Configuration Guide* Andrew Hay, Keli Hay, Peter Giannoulis, 2009-02-07. While Nokia is perhaps most recognized for its leadership in the mobile phone market, they have successfully demonstrated their knowledge of the Internet security appliance market and its customers' requirements.

Chris Christiansen, Vice President, Internet Infrastructure and Security Software, IDC Syngress has a long history of publishing market-leading books for system administrators and security professionals on commercial security products, particularly Firewall and Virtual Private Network (VPN) appliances from Cisco, Check Point, Juniper, SonicWall, and Nokia. See related titles for sales histories: *The Nokia Firewall VPN and IPSO Configuration Guide* will be the only book on the market covering the all-new Nokia Firewall VPN Appliance suite.

Nokia Firewall VPN appliances are designed to protect and extend the network perimeter. According to IDC research, Nokia Firewall VPN Appliances hold the 3rd worldwide market share position in this space, behind Cisco and Juniper NetScreen. IDC estimated the total Firewall VPN market at 6 billion in 2007, and Nokia owns 6.6% of this market. Nokia's primary customers for security appliances are mid-size to large enterprises who need site-to-site connectivity and mid-size to large enterprises who need remote access connectivity through enterprise-deployed mobile devices. Nokia appliances for this market are priced from 1,000 for the simplest devices (Nokia IP60) up to 60,000 for large enterprise and service provider class devices like the Nokia IP2450 released in Q4 2007. While the feature set of such a broad product range obviously varies greatly, all of the appliances run on the same operating system, Nokia IPSO.

IPSO refers to Ipsilon Networks, a company specializing in IP switching, acquired by Nokia in 1997. The definition of the acronym has little to no meaning for customers. As a result of this common
