Action Production and Communication APC the Theory of Didactical Situations TDS the Anthropological Theory of the Didactic ATD the approach of Abstraction in Context AiC and the Theory of Interest Dense Situations IDS A synthetic presentation of each theory and their connections shows how the activity of networking generates questions at the theoretical methodological and practical levels and how the work on these questions leads to both theoretical and practical progress The core of the book consists of four new networking case studies which illustrate what exactly can be gained by this approach and what kind of difficulties might arise

Stroeker,J.F. Kaashoek,2012-12-06 his book grew out of the wish to let students of econometrics get acquainted T with the powerful techniques of computer algebra at an early stage in their curriculum As no textbook available at the time met our

requirements as to content and presentation we had no other choice than to write our own course material The try out on a group of 80 first year students was not without success and after adding some necessary modifications the same material was presented to a new group of students of similar size the year after Some more adjustments were made and the final result now lies before you Working with computer algebra packages like Derive Mathematica and Maple over many years convinced us of the favourable prospects of computer algebra as a means of improving the student s understanding of the difficult concepts on which mathematical techniques are often based Moreover advanced mathematical education be it for mathematics itself or for mathematical statistics operations research and other branches of applied mathematics can greatly profit from the large amount of non trivial mathematical knowledge that is stored in a computer algebra system Admittedly the fact remains that many a tough mathematical problem such as solving a complicated non linear system or obtaining a finite expression for a multiple parameter integral can not easily be handled by computer algebra either if at all
