

Touchpanel as Part of Cresnet System

This section of the Operations Guide only applies to those using the touchpanel in a Cresnet System. It provides descriptions regarding programming via SIMPL Windows and details on how to connect the panel to load a program.

Programming with SIMPL™ Windows®

NOTE: Graphical touchscreen design is accomplished using VisionTools Pro (VT Pro). VT Pro is a Windows compatible software package for creating Cresstron touchpanel screen designs. Refer to "Software" on page 2 for additional details regarding VT Pro.

SIMPL (Symbol Intensive Master Programming Language) is an easy-to-use programming language that is completely integrated and compatible with all Cresstron system hardware. The objects that are used in SIMPL are called symbols. SIMPL Windows offers drag and drop functionality in a familiar Windows® environment.

SIMPL Windows is Cresstron Electronics' software for programming Cresstron control systems. It provides a well-designed graphical environment with a number of workspaces (i.e., windows) in which a programmer can select, configure, program, test, and monitor a Cresstron control system.

The next two subsections describe a sample SIMPL Windows program that utilizes a touchpanel. The first subsection details how the sample program works with a textual description and block diagram. The second subsection provides a broad description of how to actually create the SIMPL Windows program.

NOTE: The following description assumes that the reader has knowledge of SIMPL Windows. If not, please refer to the extensive help information provided with the software.

NOTE: There is no need to recreate the sample SIMPL Windows program. A similar copy of this program is available from Cresstron's ControlCD (version 5.1 and later) or the Software Downloads page (Examples Library) of the Cresstron website (www.cresstron.com). Search for the ST-1550C.SMW project in the SIMPL Windows Example Base.

How the Program Works

A basic STS Touchpanel SIMPL program is shown on the next page in block diagram form. For this example, the ST-1550C is the user interface in a relay-controlled lighting system with four preset scenes and an OFF scene. To activate a scene, the corresponding relay on the built-in low voltage relay card in the CNMSX-PRO must be latched. To turn the scene off, use the clear function of the INTERLOCK symbol to open all relays.
