Programming For Peace 2 Advances In Group Decision And Negotiation:

Négociation et transformations du monde Christophe Dupont, 2007 **Computational Conflict Research** Emanuel Deutschmann, Jan Lorenz, Luis G. Nardin, Davide Natalini, Adalbert F. X. Wilhelm, 2019-11-09 This open access book brings together a set of original studies that use cutting edge computational methods to investigate conflict at various geographic scales and degrees of intensity and violence Methodologically this book covers a variety of computational approaches from text mining and machine learning to agent based modelling and social network analysis Empirical cases range from migration policy framing in North America and street protests in Iran to violence against civilians in Congo and food riots world wide Supplementary materials in the book include a comprehensive list of the datasets on conflict and dissent as well as resources to online repositories where the annotated code and data of individual chapters can be found and where agent based models can be re produced and altered These materials are a valuable resource for those wishing to retrace and learn from the analyses described in this volume and adapt and apply them to their own research interests By bringing together novel research through an international team of scholars from a range of disciplines Computational Conflict Research pioneers and maps this emerging field The book will appeal to students scholars and anyone interested in the prospects of using computational social sciences to advance our understanding of conflict dynamics **Group Decision and Negotiation: Theory, Empirical Evidence, and Application** Deepinder Bajwa, Sabine T. Koeszegi, Rudolf Vetschera, 2017-01-24 This book constitutes revised selected papers from the 16th International Conference on Group Decision and Negotiation GDN 2016 held in Bellingham WA USA in June 2016 The GDN meetings aim to bring together researchers and practitioners from a wide spectrum of fields including economics management computer science engineering and decision science The 12 papers presented in this volume were carefully reviewed and selected from 70 submissions They deal with the fundamental part of all decision processes and individual preferences the situations of group decision making the collective decision making in situations characterized by a higher level of conflict and the group processes and negotiations in different subject areas **Introduction to Conflict Resolution** Sara Cobb, Sarah Federman, Alison Castel, 2019-07-02 The field of conflict resolution has evolved dramatically during the relatively short duration of the discipline s existence Each generation of scholars has struggled with the major puzzles of their era providing theories and solutions that meet the needs of the time only to be pushed forward by new insights and at times totally upended by a changing world This introductory course text explores the genealogy of the field of conflict resolution by examining three different epochs of the field each one tied to the historical context and events of the day In each of these epochs scholars and practitioners worked to understand and address the conflicts that the world was facing at that time This book provides a framework that students will carry with them far into their careers enriching their contributions and strengthening their voices Rather than a didactic approach to the field students will develop their critical analytical skills

through an inductive inquiry Students will broaden their vocabulary grapple with argumentation and develop critical reading skills

The Era of Private Peacemakers Marko Lehti, 2018-07-07 The field of peacemaking is in turbulent change There are more peacemaking actors than before but fewer success stories and an increasing number of violent conflicts tend to resist negotiated agreements Tools and practices created for traditional inter and intra state conflicts have become ineffective and revision of old mediation practices is called for This book examines how the private peacemaking organisations have faced this challenge In the 21st century private peacemakers have become a central part of peace diplomacy and have appeared as flexible actors whose innovative thinking paves the way for reconsidering and reinventing old practices of mediation Instead of emphasizing the act of resolution a new emphasis is given to the transformation of violence into a peace system the complexity of conflict and the inadequateness of rational management Furthermore this shift has brought civic society actors from the field of reconciliation to the field of peace mediation This new pragmatic approach under development can be called dialogic mediation

Technology, Theory, and Practice in Interdisciplinary STEM Programs Reneta D Lansiquot, 2016-08-26 This book highlights models for promoting interdisciplinary thinking and an appreciation for interdisciplinary understanding among students in STEM related fields Students majoring in science technology engineering and mathematics often perceive that courses in their major are not related to the general education liberal arts courses required for their degrees This separation prevents the transfer of skills between their general education courses and their degree pursuits The false dichotomy is particularly important because solving the daunting challenges of the twenty first century such as drug resistant bacteria scarcity of natural resources and climate change requires global citizens armed with robust complex abilities who can integrate interdisciplinary concepts with bold technologies Contributors to this book explore ways in which this dichotomy can be overcome
