

## PROGRESS NOTES

Progress notes are an important and ongoing part of Medicare documentation and record psychotherapy interventions that occur in each session. Progress notes should reveal the therapeutic interventions used such as behavior modification, insight-oriented or cognitive behavior techniques. They also demonstrate the patient's response to treatment including strength, limitations, and progress. Dates of subsequent, missed, and cancelled appointments are always recorded. Coordination of care with the primary care physician, and other significant health care providers, guardians, and caretakers is also recorded.

## QUARTERLY SUMMARY

For long-term Medicare patients receiving psychotherapy services, it is helpful to document a quarterly summary which includes:

- › A review of the goals of therapy
- › Progress as a result of therapy
- › An updated treatment plan
